LLC

# Let's Make Progress Together

## Our Mission

Our mission is to improve educational outcomes for children and families by providing exceptional resources, support, and customized services to educators and policymakers.

## Our Method

We promote the use of evidence-based instructional materials, strategies, and implementation within a Multi-Tiered System of Supports (MTSS) for young learners, students, and systems. We use implementation science to inform the use of MTSS in our Atomic MTSS<sup>SM</sup> model.

## Our Talent

Public Progress works with a network of affiliate partners to serve public and nonpublic schools, state and intermediate education agencies, and any other organization with a commitment to education. Our network includes experts in education laws & policy, special education, curriculum, assessment, MTSS, educational psychology, Positive Behavior Interventions and Supports (PBIS), challenging behavior, literacy, math, data-based decision-making, data analysis, finance, and human resources.

## Our Services

### Specialty Services

We specialize in working with district and school leadership teams to create services customized to their needs in strategic planning, needs assessment, professional learning, and continuous improvement.

### Customized MTSS Consulting

We meet clients wherever they are on their MTSS journey. We prefer to do a consultation and recommend a plan after listening to your needs. We get frequent requests for assistance with topics like classwide intervention, assessment inventories, special education in MTSS, and matching interventions to student need.

### Resources Subscription Package

For a flat monthly fee you can subscribe to our resource package and get 3 services:

- Call Anytime (or text & email) with questions,
- full access to the curated Resource Catalog, and
- delivery of the Quarterly Education Digest (QED) to your inbox.

Subscriptions start at less than \$50/month for 10 people to access to the Resource Catalog and QED, 3 of whom can use the Call Anytime feature.

### Webinars

Registration for live webinars on timely & relevant topics is available on the website beginning at \$25/person. We frequently offer free webinars, as well.

### Online Courses

We offer online courses on common education laws and topics, many of which include continuing education credits.
