We were a proud sponsor of the LPGA Legends Championship Golf Tournament last month at the Pete Dye Golf Course. The 2014 Legends Championship will benefit Riley Children's Foundation. The Foundation and Riley Hospital for Children at Indiana University Health provide care and support of seriously ill and injured children and their families, conducting cut-

ting edge research. As Indiana's only nationally ranked children's hospital, Riley Hospital for Children at IU Health has been offering compassionate care for children and their families since 1924. I was fortunate to help out at the event and almost everyone I spoke to had a "Riley Story". My beloved sister Tammy was also a child of Riley. Without their care & support

we wouldn't have had Tammy as long as we did. What a wonderful journey ride in a little red wagon! Thanks to the French Lick Springs Resort for giving us the opportunity to be a part of Mr. Cook's dream.

Nail Gun Safety	2
Project Updates	3

## *What a view...Pete Dye Course*

## Nail Gun Safety

Nail guns are used on construction sites all the time. It is a fast and effective way to drive nails compared to a hand held hammer. The number of nails driven per hour has increased dramatically with this power tool. What use to take days to finish can now be done in hours. The nail gun use an air compressor to force the nail out of the machine and into the wood with enough force to drive it completely in to the piece you are working on. This is why **nail gun safety** is so important just like the name states it is basically an automatic gun that shoots nails rather than bullets. It can be extremely dangerous and even deadly if used incorrectly. Following the *nail gun safety tips* below will help prevent injuries and keep everyone safe at work.

### Top 12 Safety Tips For Using A Nail Gun

1. Wear safety goggles when using a nail gun the force of the air pushing the nail out can cause the wood to splinter or shard and fly into your eye.
2. Check the width of the wood and change the nail size accordingly. If the nail is to long it will protrude from the other side of the board.
3. If you are nailing into an existing wall check for electrical wiring before you begin. The metal nail touching the live wire could cause electrical shock or start an electrical fire in the wall.
4. Turn off gun whenever it is not in use. The triggers are often very sensitive and could go off unannounced.
5. remove your finger from the trigger area when you are not using it to drive a nail.
6. Never point a loaded nail gun at another person even if it is not plugged in.
7. Do not press the trigger until the nail gun is pressed firmly against the wood.
8. Never use a compressed air nail gun around flammable chemicals. They can be dangerous when mixed together.
9. Nail moving the gun forward away from you as you work. Never pull the gun toward you.
10. Clean the nail gun regularly. Remove any dust or dirty from all of the moving parts. A dirty nail gun could become jammed and continue firing long after you have released the trigger.
11. Nail from the top to the bottom of walls when you are using a nail gun.
12. Read the entire owners manual before you use a new tool. This will teach you the correct and safe way to handle the nail gun.

Lindsey's Construction will be  
closed Monday, Sept. 1st  
in observance of  
Labor Day

Sept. 1

*Have a safe Labor Day*

Labor Day

### Galloway Home

Wood flooring to be installed as soon as we get a handle on the humidity. Tile work started. We will just have base board, closets, door hardware and sidewalks to finish up.

### Best Western Plus

This project went well. Just finishing up (6) piers and we are done. Luckily we dodged the rain and the sky was overcast during the big slab pours.

*(see pics below)*

### ToLiver Façade Restoration

Tuck-pointing and painting left to do. We have submitted a price for a new roof & storefronts. Should know if accepted by next week.

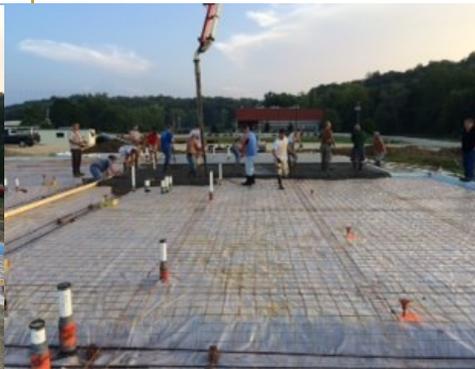

### Lake Home

Chimney's have been completed and the owner has asked for us to repair mortar joints in patio, then clean and reseal.

### Mickie's Façade

Should be ready to start work on payroll week beginning August 29th.

*Rain Rain Go Away...*

### *Fascinating Facts*

*What's outrageous enough to spur ten thousand people to a parade through NYC? A 12 hour workweek? In the late 19th century, the average working day consisted of 12 hours. Held on a Tuesday, the first Labor Day rally was held in order to gain support for the 8 hour workday.*

### Upcoming Bids

Ivy Tech Science Lab in Tell City

### Birthdays

- 8 - Kara Lindsey
- 13 - Mike Lagenour
