

SilverWriter 8800-P / 8820-P / 8850-P

- **60% higher film throughput**
- **Resolutions up to 25,400 ppi**
- **1 – 3 Film Magazines**
- **Unequaled Accuracy**
- **100% Automation**
- **“Wheel-in” Flexibility**
- **Highest Uptime Record**

Raising the throughput benchmark

The new SilverWriter 8000-P series introduces sophisticated new film-handling and operational sequencing to deliver up to **60% more films** per hour than Ucamco's previous market leader, the SilverWriter 800. **15 times faster** data processing handles the most complex PCB files without rasterizing delays. For maximum flexibility and cost control all machines can take **3 independent magazines** holding a total of **450 sheets** of film of 3 different sizes. New drive technology delivers unrivalled **uptime** and long-term reliability plus a **30% smaller foot-print** for easier installation.

Unequaled accuracy

With its unique optical system the SilverWriter 8000-P will plot the tightest toleranced designs with pin-sharp quality. 16 plot resolutions up to **25,400 ppi** (1 μ m) deliver the optimum setting for every image down to **10 μ m** features. Two unique imaging functions, syntectic modulation and **sub-micron** pixel-placement, eliminate the rounding errors found on conventional plots and hold line-width accuracy below 2 μ m. Dynamic beam positioning and the patented stress-free film loader ensure an unrivalled **geometric accuracy** on every plot for perfect side-to-side registration.

Reliable 24/7/52

The SilverWriter 8000-P is engineered for round the clock, **long-term reliability**. The ultra-stable granite bed, maintenance-free linear motor, air-bearings and the new direct-drive drum deliver unparalleled long-term uptime - your guarantee of on-time deliveries, low whole life costs and an optimum return on your investment.

Compatibility and choice

The SilverWriter 8000-P accepts plot instructions directly in UCAM, Genesis, OI5000 (Expert) or MDA formats, making it a “wheel-in” replacement for conventional plotters. **Choose** from standard, double or quad speed, up to 16 resolutions (metric and imperial) per machine, & 1 - 3 film magazines. With a well-proven **upgrade path** we can set up a SilverWriter 8000-P to your precise requirements now and in the future.
