Hi Bonnie,
This is AWESOME!!!! You are the best! It's PERFECT!!!
... at the Board Meeting everyone appreciated it and commented on [how] great you all have been to work with and your participation has also helped our show become more successful. No one argued those points either!!!

Fight Clay Formations with CLAYMASTER

Wyo-Dex's CLAYMASTER is a concentrated, nonhazardous, proprietary clay inhibitor which can be used with either polymer or bentonite systems. It keeps clay cuttings from sticking to each other and drilling tools while reducing or even eliminating swelling of the borehole. CLAYMASTER significantly reduces rotation and pullback pressures, easing wear and tear on your tooling.

When used with the pilot hole and pullback, CLAYMASTER greatly reduces torque and absorbs water.
