

Could Be

All I've had is one small glance
And all I want is another chance
And, all I want for you to see
Is how it could be

Forget all the places that you've been
Erase all the images you have seen
And don't worry about the next heavy wind
But how it could be

That's the way it could be
Every day of your life
That's the way that it should be
Everyone

So, come with me
Watch the rainbows flow into the sea
Don't worry about time
Stay a week or two or three

Leave the world
And, come follow the moon
The sun is setting
And, it's way too soon
To see the comet
Or, catch its' tail as it goes by
Or, hear its' breath as it glides by
