Group i&i Welcomes Eve Wenger as Newest Senior Associate

Eve Wenger, MBA, joined Group i&i as its latest associate.

“We welcome Eve enthusiastically to our Group,” said Kathy Wiener, MPA, who has served as principal for over a year, with loud applause. “Besides her proven skills in grant proposal development, Eve brings to us a wonderful disposition. She will deepen our capacity as a firm in the visioning, strategic planning, and organizational development space.”

In her previous roles, Ms. Wenger helped secure over \$10M in grant funding for social service nonprofits, municipal and county governments, arts organizations, and law enforcement; and was a grant reviewer for four years with the Healthier Wisconsin Partnership Program, Medical College of Wisconsin.

She had served as a consultant for Family Promise, a national organization working to end family homelessness, and was involved in a national effort to assist the organization with strategic planning and organizational/fund development training.

Beyond her consulting services, Eve fulfilled a number of roles in the nonprofit and higher education sectors. She directed a community program at East Stroudsburg University, a state university in Pennsylvania; and led a countywide health and human services. She also served as Executive Director and member of boards at several nonprofits; and facilitated the development of large, multi-stakeholder projects.

Eve holds a Master’s degree in Business Administration from Lehigh University.

“We look forward to Eve's contributions and collaboration with us as we support an expanding array of projects serving a growing family of clients” added Wiener. “I know our clients will be well served.”

Group i&i is a growing firm based in Union, NJ, focused on deepening the effectiveness of nonprofits and their social impact. Through its work, it helps organizations expand their operational capacity and strengthen its community connections through funding, evaluation, strategic planning, and leadership development. The Group's vision is to help individuals and communities become fully empowered and self-sustaining.
