Independent labelling system

CWL-150 SA labelling head, a new generation of CWL - series, designed maximum accuracy and expanded capabilities.

The CWL-150 SA self adhesive high speed label applicator can be integrated in to a packing line or an existing conveyor. It is available for horizontal or vertical labelling.

Designed for small and large packages, sachets or containers.

The paving head can be integrated into existing conveyor by means of a support that can be adjusted in height by a crank handle.

This labelling machine can also be mounted on a portable stainless steel frame.

The modular self-adhesive high-speed label applicator features a 10-inch color touchscreen (HMI), which can be programmed to hold multiple receipts allowing users to easily recall rapid and repeatable product changeovers. It can process full label rolls up to a diameter of 380 mm.
