

User Name and Password

“Enter with the password: “Thank you!” Make yourselves at home, talking praise. His faithfulness remains from generation to generation.”
(Psalm 100:4-5, MSG)

It feels like we're always creating new passwords for accounts. No matter that the online account, you are expected to enter a password. It's no secret that your passwords have substantial value to cybercriminals. Using secure and unique passwords is vital to keeping your information secure.

Passwords are something we all struggle with, since we need so many of them and we are told, for security reasons, they need to be different! You can't access your account without them!

How many times have you entered the wrong password or user name only to see you are denied access! Isn't it great that access to God is so easy.

Jesus is definitely your “username” that opens the way to God. You can talk to Him at anytime, about anything, never having to worry about the His “system being unavailable.”

It is so incredibly easy. You go through His open gates with thanksgiving and enter His courts with praise. Every day, you have opportunities to acknowledge that He is Lord your God, He made you and you belong to Him. Every day you can proclaim with joy that you are His child.

No wonder Psalm 100 says, “Enter with the password: Thank you!”
For God is all-generous in love, loyal always and ever.
