

HANDICAPPED ACCESSIBLE PORTABLE RESTROOM

Our handicapped accessible portable bathrooms provides accommodations for those who require special facilities. The handicap is a larger size portable restroom facility with extra safety features for the convenience and comfort of those who require added functionality. This restroom includes an extra wide doorway for easy access, and handrails for support. These features with ground level access are appropriate for wheelchair or walker access or parents with small children or strollers. The Americans with Disabilities Act requires that at least five percent of a single user portable toilet cluster at a single location be wheelchair-accessible (roughly 1 wheelchair-accessible unit for every 20 regular restrooms for public events).

Great for park districts and required for most special events. It features:

- Strong, full-width handrail
- Automatic door closure is balanced by a heavy-duty cable spring for convenient access
- A 1/2"-thick floor provides ground-level access
- Waterless Hand Sanitizer
- Meets Federal ADA Guidelines
