

Name _____

Date _____

1. Use the number line to find the product. Then complete the equation.

2. Use the area model to find the product. Then complete the equation. The area model represents 1.

$$\frac{4}{6} \times \frac{3}{4} = \underline{\hspace{2cm}}$$

3. Multiply. Draw a model to find the product.

$$\frac{3}{5} \times \frac{2}{3} = \underline{\hspace{2cm}}$$

REMEMBER

4. Estimate the quotient. Then complete the vertical form and check your work.

$$608 \div 76 \approx \underline{\quad} \div \underline{\quad} = \underline{\quad}$$

7	6)	6	0	8

Check:

$$608 = \underline{\quad} \times 76$$

5. Estimate the quotient. Complete the tape diagram. Then complete the vertical form and check your work.

$$68 \div 17 \approx \underline{\quad} \div \underline{\quad} = \underline{\quad}$$

a.

b.

1	7)	6	8

Quotient: $\underline{\quad}$

Remainder: $\underline{\quad}$

Check:

$$68 = \underline{\quad} \times 17$$
