Commodities Energy Trade Idea

Comment:

Long crude oil *while above the 10-day EMA*

- Crude oil remains very strong on Iran & Venezuela woes
- These lofty levels essentially erased the US sanctions against Russia & will hurt the US economy in the medium term
- Crude trades above both its 10- & 21-day EMAs + trendline rising since 8/31
- Initial resistance: 70.76
- Further resistance: 72.08 & 73.64
- Initial support: 68.50
- Further support: 66.85, 65.80, 64.60 & 60.00
- Fast stochastics: bullish

Commodities Metals Trade Idea

Comment:

Short gold *while below its 21-day EMA*

- Gold possibly bottomed at a 5-month low
 - It trades around its 5-day EMA but below its declining 21-day EMA
 - Ignoring the intraday break on 4/11, gold remains in a medium-term declining channel
 - Immediate support: 1,301.50
 - Further support: 1,291 & 1,266
 - Initial resistance: 1,327
 - Further resistance: 1,365 & 1,385
-
- Fast stochastics: slightly bullish

Soft Commodities Trade Idea

Comment:

Short corn *while below the 5-day EMA*

- Corn, along with the other major softs, seem to have peaked last week
- Corn fell from a near 2-year high and sank below its 5-day EMA
- The divergence between its 5- & 21-day EMAs suggests further weakness
- Immediate support: 389.00
- Further support: 384.40 & 376.25
- Initial resistance: 400.00
- Further resistance: 406.55 & 413.85
- Fast stochastics: slightly bearish

How to Use the Heat Map

Bias: If the Candle > 21-period EMA = bullish
 If the Candle < 21-period EMA = bearish
 If the Candle around 21-period EMA = sideways

Long or Short	Commodities	Since when		Risk: Bullish or Bearish Candle as of Monday am EST					
		Daily Model	since	Daily Bias (> or < 21-day EMA)	Daily Risk	Weekly Model	since	Weekly Bias (> or < 21-week EMA)	Weekly Risk
Energy	Crude (CLc1)	S	27-Apr	bullish	slightly bullish	L	23-Mar	slightly bearish	slightly bullish
	Brent (LCOc1)	L	21-Apr	slightly bullish	slightly bullish	L	6-Apr	slightly bearish	slightly bullish
