Introduction

If the job could talk, it would clearly define the knowledge, hard skills, people skills, behavior and culture needed for superior performance. Your unbiased input regarding the specific requirements of the job in question has been applied to the TriMetrix® DNA Job benchmarking process. The result is an evaluative report that analyzes a total of 49 separate areas, presented in three sections:

Job Competencies Hierarchy (25 Areas)

This section presents 25 key job competencies and quantifies their importance to this specific job. Each job has a unique ranking of competencies, reflecting different levels of capacities required by different jobs for superior performance.

Driving Forces Hierarchy (12 Areas)

This section clearly identifies the rewards the job may provide. More specifically it identifies sources of motivation for the individual performing the job. It clarifies what is necessary for superior performance and engagement on the job.

Behavioral Hierarchy (12 Areas)

This section explores the behavioral traits demanded of the job. The higher the ranking, the more important the behavioral trait will be to the job for stress reduction and superior performance.

The results of each area are ranked on a scale, reflecting the unique levels of applicability and importance to the job. These rankings illustrate what is essential for this job to deliver superior performance and maximum value to your organization.

Key Characteristics of the Position

The position has been analyzed relative to four key characteristics. These characteristics are accountability for results, results through people, authority, and risk. Based on the responses to the questionnaire, these characteristics have been measured on a sliding scale and are illustrated by a bar graph. The scale range includes none, slight, moderate, significant, and major.

Accountability For Results: This characteristic addresses the accountability for producing measurable results in the position. This includes accountability for meeting financial, operations and/or system objectives.

Results through People: This characteristic address the emphasis on producing results through the efforts and cooperation of people. This characteristic is not limited to management or leadership positions. Many non-management or leadership positions in team-based organizational structures depend heavily upon the efforts and cooperation of people to produce results.

Authority: This characteristic addresses the level of authority that exists in the position. Evidence of authority can be found in the ability to make decisions or changes without prior approval from upper management. This characteristic is not limited to management or leadership position. In their efforts to become more responsive, many large organizations are finding it necessary to drive decision-making downward. In these organizations, many positions can be characterized by a moderate to significant amount of authority but are not considered management or leadership.

Risks: This characteristic addresses the inherent level of business risk or liability to the organization that exists in the position. Positions with indications of moderate, significant or major levels of inherent risk or liability to the organization may warrant the use of drug, alcohol and/or other appropriate assessments in their selection and management systems.

Hierarchy of Competencies

The competencies required for superior performance have been prioritized based on the analysis of responses to the questionnaire. The hierarchical order of the competencies represents their relative importance to each other in producing superior performance in the job.
