Position: **Senior IA/Security Specialist, C&A RMF Package Validator**

Education: B.S. in a Computer Information Systems or related field

Job Description: Upon receiving data /deliverables from the customer, the Senior IA Security Specialist C&A RMF Package Validator shall perform risk assessments and provide specific feedback to the customer for changes. He or she will then engage with the customer and NAVAIR Echelon II via phone and face-to-face meetings to facilitate closure of tasking.

Responsibilities:
- Performing risk assessments and providing specific feedback to the customer for changes as necessary.
- Escalating risk/issues to the Government throughout the project in accordance with a defined C&A tollgate process, when applicable.
- At completion of risk assessment/evaluation, updating the project plan in the government approved format and appropriate software application (i.e. SharePoint, etc.) and notifying the Government within five (5) business days for an approval and final adjudication of package.
- Conducting annual validation for each TOE in accordance with DOD and DON policy.
- Emphasizing and utilizing real-time data sources (ACAS, HBSS, VRAM) to perform these activities, augmented by face-to-face validation with the system stakeholders as required

Qualifications:
- 8+ years of experience in IT/Computer Network Operations/Cyber Security field
- IAM Level III: CISSP, CISM, or GSLC certification
- B.S. in a Computer Information Systems or related field
- Secret Clearance with SSBI or TS/SCI with SSBI
