Michael Acevedo says Charlie's Home Décor covered all the bases when they installed plantation shutters on five windows and two large electric shades. "From the day I made an appointment to get an estimate to the day the installation was completed, the experience has been nothing less than perfect," he says. "Overall, I could not have asked Charlie's for anything more. He even swept and vacuumed the areas where they worked, painted, plastered and caulked any holes that needed to be made, so you couldn't even tell any work was done that day."

When Barbara Corrigan's freezer wasn't keeping her food frozen, she called the AAA Century Appliance to cool it down. "The technician arrived on time — even called ahead to confirm that he would arrive as promised — and did a thorough analysis of the refrigerator. He explained what he was doing and why and what the source of the problem was: a circuit board failure," she says. "He promptly replaced the circuit board, confirmed that the new board and the compressor were working correctly, cleaned the area and repositioned the refrigerator."

spot-on painters

A-Best Painting Contractors

Hollywood

Overall grade: A

Number of reviews: 197

Jon Gibbs was happy, and somewhat surprised, about how quickly Richard Guitar, owner of A-Best Painting Contractors, strummed up a response when he needed to make a change. "The night before, I realized that one painter would not be enough to complete the job in eight hours, and so I called Richard at 6 p.m. to see if I might be able to add a second painter for the next morning. Even on such short notice, Richard was able to accommodate my request," he says. "They worked efficiently throughout the eight hours to complete all phases of the project."
