Subtract. Show your work.

1. $13 \frac{9}{14}-5 \frac{2}{7}=$
2. $7 \frac{3}{5}-2 \frac{11}{15}=$ $\qquad$
3. $9 \frac{7}{18}-6 \frac{5}{9}=$ $\qquad$

## REMEMBER

Write an expression that represents the word problem. Draw a tape diagram if it helps you.
4. There are 23 students in Miss Baker's class. There are 27 students in Mr. Sharma's class. The entire school has 6 times the number of students in Miss Baker's and Mr. Sharma's classes. How many students are in the entire school?

Use the Read-Draw-Write process to solve the problem.
5. Julie splits 6 cups of dog food equally between 4 dog bowls. The red bowl already has $\frac{1}{4}$ cup of dog food in it. How many cups of dog food are now in the red bowl?
