INCIDENT COMMAND POSITIONS

INCIDENT COMMAND - Establish Command

WHO – FIRST ON SCENE

Then: Most qualified

Safety Officer – Reports DIRECTLY to IC. Can stop the event if unsafe actions and ask for more source planning.

MEDICAL Branch Director – Manages ALL MEDICAL including; Triage, Treatment & Transport. Give direct orders to the three “T’s”.

EXTRICATION Branch Director – Manages all Extrication & difficult patient movement. This person can be a “worker-bee”. This person will be assigned to manage lift evac if people still trapped on lift or work with Transportation.

Triage Supervisor – Does the INITIAL TRIAGE using ribbons or ASSIGNS a person to this task. Call immediately with color of patients as triaged. Most Important job: Manages Triage.

Treatment Supervisor – Immediately SETS UP the Treatment Areas. Is responsible for tagging ALL patients with TRIAGE TAGS. Will work directly with Transport for patient removal.

Transport Supervisor – Assists in moving triaged patient into the treatment area. Then moving tagged patient from Treatment to where EMS is located. Responsible for quick assessment of equipment needed .

Logistics – Works under TRANSPORT Supervisor. IMPORTANT JOB – Management of all equipment needed for the incident.

Comm’s Person/IC Aid – Assists IC with Planning or monitoring second medical frequency.

MCI TRIAGE (START)

Standard techniques of first impression, primary survey, & secondary survey take TOO MUCH TIME.

START Plan (Simple Triage and Rapid Treatment):

- 1) Identify the "Walking wounded".
- 2) NEW –STOP THE BLEED
- 2) Assessment and basic care of ventilation.
- 3) Assessment and basic care of circulation.
- 4) Assessment of mental status.

START Triage
