

## Solar Equipment Dealer and Distributor

- Solar air conditioning alternatives
- Water heating alternatives
- Solar pool heating

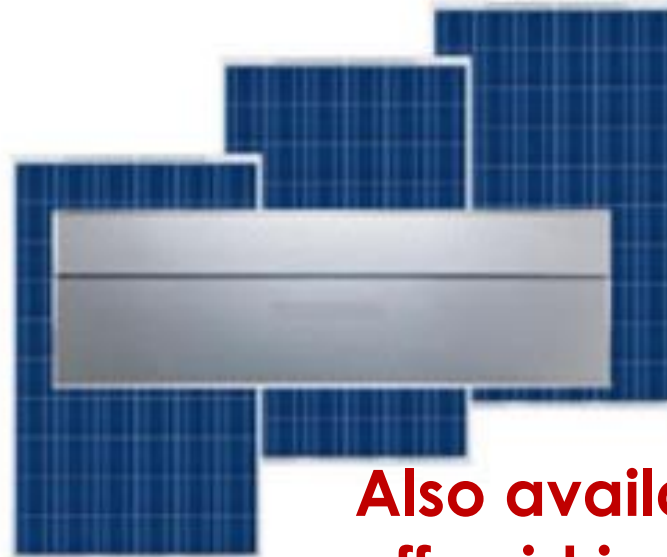

# AC-DC Solar Air Conditioners SEER 65+ Solar Heating & Cooling

**SEER 65+ Solar Heat Pump with Two Solar Panels & No Batteries. [More >>>](#)**

**Runs direct from solar panels and 220V AC power.  
Get Over 80% Daytime Savings.**

*Solar AC uses one, two, or three PV panels.*

**Also available for 100%  
off-grid installations.**

FREE hot water from the heat discarded by your air conditioner

**This 1.5 ton air conditioner saves electricity and makes 100 gallons of free hot water per day.**

## **Save Money & Help The Environment**

**If you are located in a southern climate and your air conditioner will run most of the year, or if you need to air condition a workspace all year long to cool a kitchen, server room, or other constant heat load, this Air Conditioner Water Heater will pay for itself quickly with FREE HOT WATER and lowered electrical operating costs.**

# Solar Panels to warm swimming pools.

Can be mounted on roof or many other alternatives.

Water from the return lines circulates through the panels.

Controller provides differential temperature control with an adjustable, calibrated water temp high limit. Automatic nocturnal cooling (for pools that overheat in hot climates).

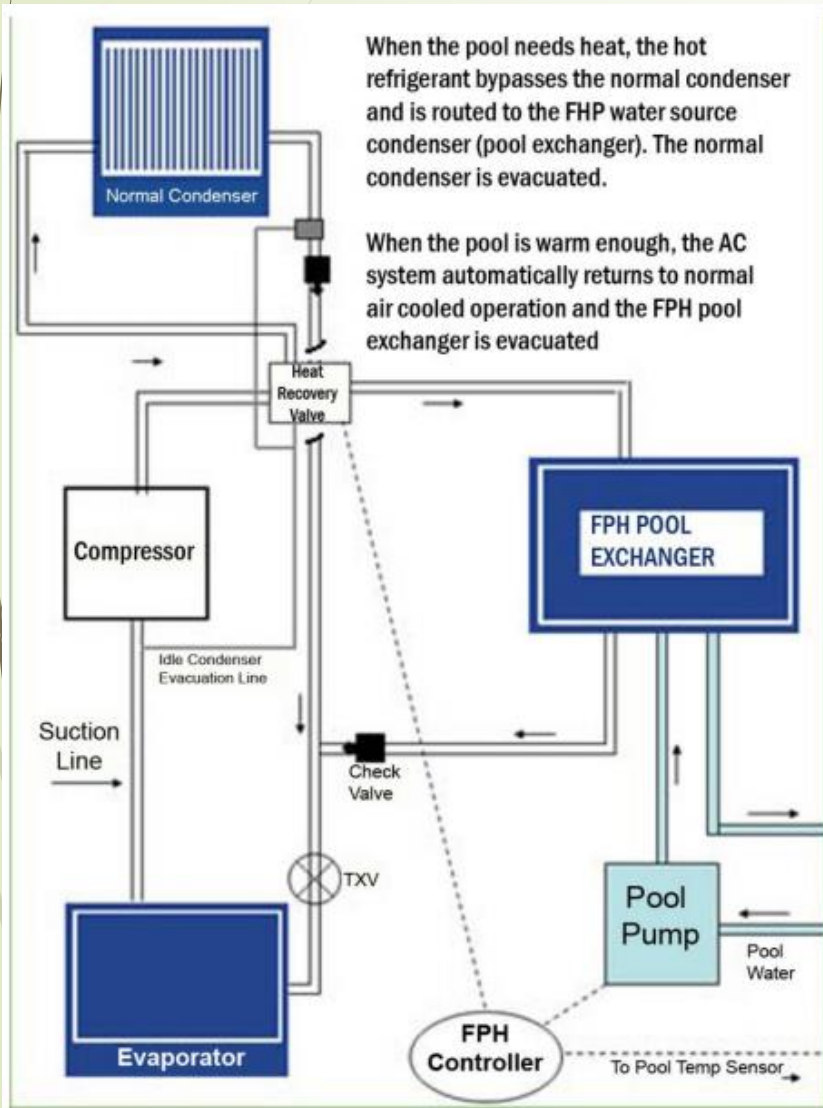

# Heat Recovery units to warm swimming pools.

This pool heater provides free pool heating by recycling the waste heat that your air conditioner throws away.

In the process, it increases the efficiency of your air conditioner, saving more than 25% on electricity costs for indoor cooling.

**The heat recovery pool heater heats your pool for**

**free** Titanium Heat Exchangers

Heat Recovery Valve
