Do **NOT** touch your piercing without washing your hands!

Do **NOT** use hydrogen peroxide or rubbing alcohol on your piercing.

Take an anti-inflammatory for 10 days to reduce swelling. Follow instruction on bottle.

Wildman's does **NOT GUARANTEE** body jewelry against manufacturer defects.

Once patron has **LEFT** the building all body jewelry is **NOT GUARANTEED** and will not be replaced.

If there are any signs of infection, notify your healthcare/dentalcare provider.

## Oral Piercings

Please use an anti-septic alcohol free mouth wash with no dilution anytime you would eat, drink or smoke.

Take a capful of the mouth wash and swish for 30 seconds then spit out.

Use sterile saline solution and swish for atleast 30 seconds twice (2) daily.

Beware of seafood, hot, spicy, or acidic food for the next fourteen (14) days.

For all tongue piercings avoid beer or yeast based liquor for the next fourteen (14) days.

## External Piercings

For all plasma build-up, rinse fresh piercing under hot water in the shower for five (5) minutes daily.

We recommend using a sterile saline solution for cleaning your new body piercing.

Use a clean non -woven gauze pad and spray the saline on the gauze.

Hold the non-woven gauze soaked in saline on the fresh piercing for five (5) minutes twice a day.

Pat dry with clean paper towel.

## Surface Anchors

For all plasma build-up, rinse fresh piercing under hot water in the shower for five (5) minutes daily.

We recommend using a sterile saline solution for cleaning your new body piercing. (refer to external piercings)

Leave bandage on for 24 hours.

Before bed apply a small circular bandage over piercing to protect during sleeping hours, we bandage prior to removing.
