Christine Riddell (Why I Love Sunrider)

When I was introduced to Sunrider over 12 years ago, I was given a pamphlet that had a picture of two young people running on it. I said, "What are we buying here— youth?" Well, it didn't take long to see that I was buying something extremely special—I have regained much youth and vitality. It is wonderful when people ask, "How old are you?" I love saying I am 61-years young and drug free.

In Sunrider, Dr. Chen has the Philosophy of Regeneration®, which is to nourish, cleanse, and balance the body. I feel very blessed to have found this life-changing balance. I am compelled to share these marvelous products with others, and it is so rewarding to see them come to love these products too.

Before we joined Sunrider, my husband and I participated in a shooting sport called IPSC. After using the Sunrider® foods for six months, I went from shooting 40%–45% of the top shooters to 70%–75%. What a noticeable difference. This sport was all about speed and my reaction time had really picked up. I used to be too tired to even think of going to the gym. Now I go to the gym and am on-the-go all day when I know others my age must nap.

I absolutely love and highly value the Sunrider® foods and all the other Sunrider® products. I recently had another "new experience" with SunSmile® Fruit & Vegetable Rinse and SuperClean™ Laundry. I cleaned a mirror with the Fruit & Vegetable Rinse and I could not believe how well it cleaned that mirror! I knew SuperClean™ Laundry worked great on stainless steel kitchen appliances, so I thought I'd try it on the windows. Again, what a wonderful discovery! I have never cleaned windows so quickly and easily. Just wash with SuperClean™ Laundry, dry quickly, and walk away (after you admire the shiny window!). The best part was no matter how dirty the cloth got when washing the window, the cloth cleaned right up with a quick rinse in the SuperClean™ Laundry water. My husband and I recently decided to wash the truck. There was tar and, of course, bugs on it. The SuperClean™ Laundry melted those bugs off and easily took the tar off. This was using just ½ tsp. of SuperClean™ Laundry to a bucket of water. We both kept saying, "This is unbelievable!" I love that these products are so safe (no degreasers in them), unlike conventional products. My hands felt wonderful, not all dried out.

My sincere thanks to Drs. Chen.
