

THE CRUCIFIXION OF JESUS

THE PROBABLE MATHEMATICAL PROPERTIES OF THE BLOOD ATONEMENT

The purpose of this illustration is to built upon the work of the late Ron Wyatt and his theory about the place and circumstances surrounding the crucifixion of Jesus Christ. Specific to the research or Ron Wyatt, this study suggests that if the stipulations are correct, then the following correlations are probable based on approximate mathematic measurements of distances primarily from the point of the supposed spot of the crucifixion of Jesus Christ. According to Ron Wyatt's eye-witness account, he dug through to the cave where the *Ark of the Covenant* was and the other main Temple furnishings were hid-away before the Babylonians came and led Judah to the Captivity or 2nd Diaspora. Astonishing, Wyatt surmised that the crucifixion spot was directly upon some 40 feet. Moreover, during the earthquake that is recorded in the Gospels, the rocks rent to create a crevasse that let the blood of Jesus flow down to the very Mercy Seat of the Ark. The Jews are looking upon a coming Messiah figure that will likewise build the 3rd Temple in time of 'peace'. After the Diaspora in Babylon for 70 years, it took a Cyrus type of man to decree that Jerusalem be rebuilt. This facilitated later on the eventual contrition of the House of YHVH. There was a actually a lull in the time the return of the Exiles started to come back and the walls were built to when the 2nd Temple was constructed. In the Last Days, will there be a repeat of this prophetic and historical pattern? It already appears to be so. Since 1948, the Exiles from the last Diaspora since 70 AD started to return to Israel and the walls have been built up now. What remains is the construction of the 3rd Temple. Who will be this coming 'Cyrus Anointed' that will facilitated the decree? What could be 1 of the main catalysts do demand such a Temple? One such variable and element would be the reveling of the Ark of the Covenant.

This study suggests that the very crucifixion of Jesus Christ was fashion in pure mathematical term and distances to include a phi ratio factor that correlated approximately to how far the Ark of the Covenant was in approximate distance from the exact crucifixion spot. Throughout the Bible, both Old and New Testament there is a clear theological application of how Jesus or the Messiah is a type correlating to the many types and shadows of various elements presented.

One such element is the Ark of the Covent. For example in a brief summation the contents of the Ark, that of the Law Tablets, the Bread or Mana and the Staff of Aaron all speak of the broken Laws of YHVH that need blood atonement or covering. The Mana or Bread speaks of how Jesus said that He is the Bread of Life. And the Staff of Aaron that budded speaks that Jesus is not only the Branch or coming Messiah Reader but that He would be resurrected.

If the top of the head of Jesus is the edge and the feet of Jesus is one factor of the entire measurement, it is speculated based on the supposition of the Garden Tomb that the height of Jesus was about 5'11". What is also a contributing factor is that based on Wyatt's excavations, Jesus was apparently elevated on to a 4 foot platform as to highlight the spot that was perhaps reserved for the most vile of offenders and to be clearly seek of the city crowds just outside the Damascus Gate.

ישוע מנצרי מלך היהודים
YESHUA KING NAZARENE MALKI JEWES

יהוה
TETRAGRAMMATON

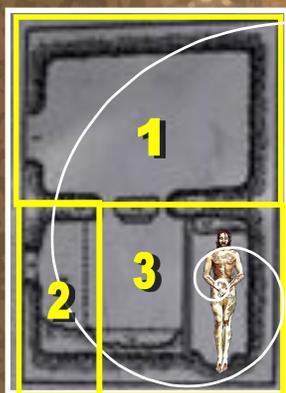

A Father sacrificing a SON

Ron Wyatt

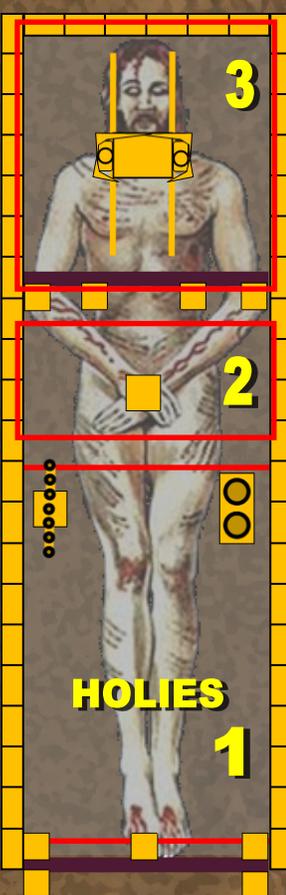

GARDEN TOMB

Behold Nail Behold Hand
tav alef
On the Cross, Adonai

HOLY OF HOLIES

The Tabernacle of Moses

This study suggests that like the very site of the crucifixion to the supposed cave where the *Ark of the Covenant* was hidden is in phi ratio proportion of distance. If one takes the height of Jesus to have been 5'11" based on the modification of the Garden Tomb, and then the 4 feet elevated crucifixion spot, then one can approximate the distance mathematically to conclude that indeed the cave right below the Cross of Calvary where the *Lamb of YHVH* was sacrificed was approximate 40 feet below.

40 feet
= 119 inches (9-11 code)
or
= 3.3 yards (33)
or
= 3.022 meter (322)

Did this event also record as a mathematical signature of month and day of Jesus' birth of September 11, -3 BC (9-11) and the age He would die on April 14, 32 AD? And having a 322 degree heading from the Dome of the Tables on the Temple Mount that many believe is the place where the Ark of the Covenant rested in the Holy of Holies?

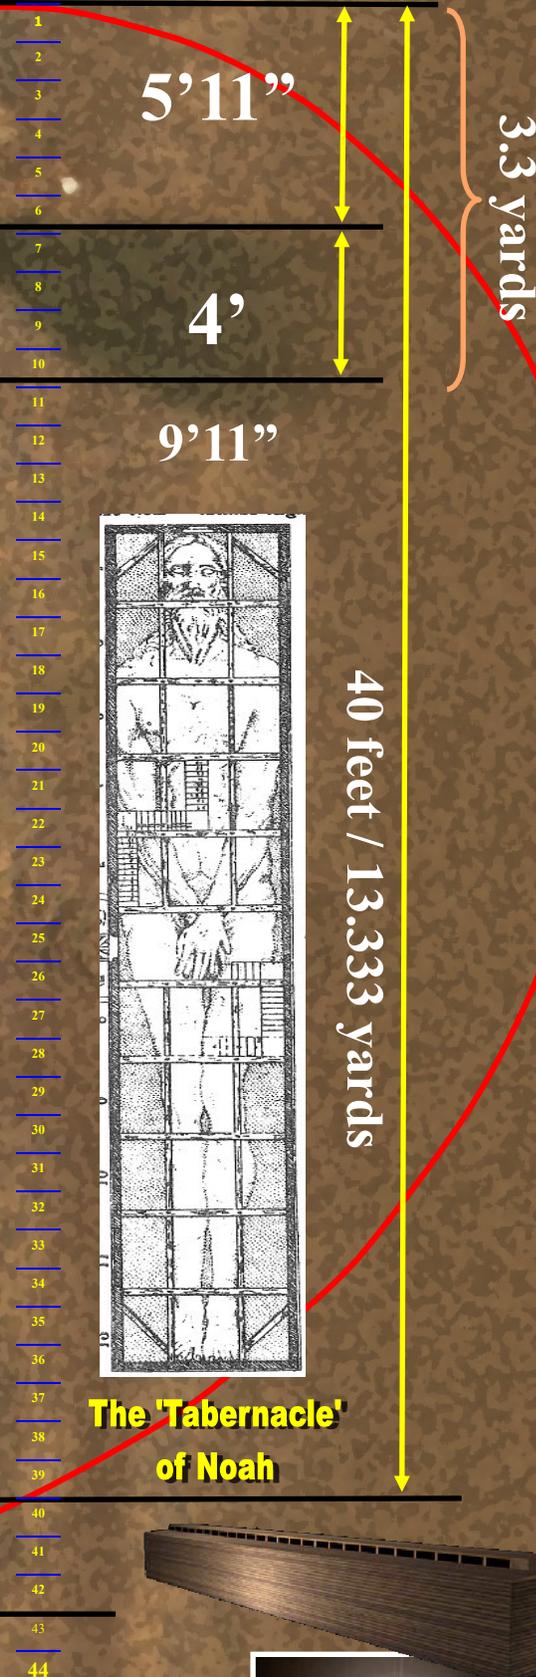

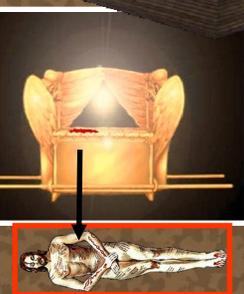

What is astonishing is that if the distance that is implied is extrapolated and elevated to a possibly prophetic significance, it speaks volumes of recurring sacred Biblical numbers and echoes the approximate dimension of the *Ark of Noah*.

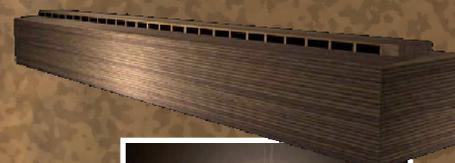

Ark of Covenant:
+ phi ratio factor applied
= ~ 40 feet or approximately 13.33 yards
= 480 inches

The Royal Bloodline
44 Kings of Israel and Judah
~44 feet from cross?

Blood Atonement

The 'Tabernacle' of Noah

What is very unique as already alluded to was that the place where the blood of Jesus was purported splattered on the Mercy Seat of the Ark of the Covenant parallel the phi ratio to that of Jesus' side wound. This supposition is based on the proportions of the body that this study suggest are also patterned in the Garden Tomb after the Tabernacle of Moses and the Ark of Noah based on total volume and area. Moreover, if the testimony of the late Ron Wyatt is accurate, even the distance of the crucifixion of Jesus to the cave below of approximately 40 feet deep is composed in approximate phi ratio.
