

THE COSMIC ARK OF DELIVERANCE

The purpose of this illustration is to depict the since Noah was the 10th Generation or last one from Adam at the time of the Flood, will the Judgment then happen at the Generation' that sees Israel's rebirth? Using Psalm 90's definition of the length of a Generation as 70 years, then the count would land you on 2018. Also if it took 120 years for the Ark to be built, you could then correlate a year-to-day-count: from 2006 as to when the Judgment starts? Shem did not die until Jacob (Israel) was 50 Years old. Israel's 'Re-Birth' was solidified on 1948. By adding Jacob's '50-Year' pattern to this time piece of Israel, you happen to land on 1998. Coincidentally, comet Hale-Bopp left the skies in 1998 on Passover. A possible correlation could be that IF the 50th year since 1948 is 1998, then the generation count from 1948 is the benchmark.

JUDGEMENT IN THE 10TH GENERATION

Several arch-types of Arks (Chests) are in Hebrew Scriptures. They were vehicles & types associated with water. The 'Arks' signified a deliverance & protection from pending judgment. The Ark or Teiva of Bulrushes was used for Moses in Egypt. It is speculated that it had the same dimension as the Ark of the Covenant. All 48 Tenons of the Tabernacle had a center groove like that of Noah Ark's door. The Tenons had, in proportion the same dimensions as Noah's. Christ at the Cross was pierced on the His side; Blood & Water flowed out as a type of an 'Ark' door.

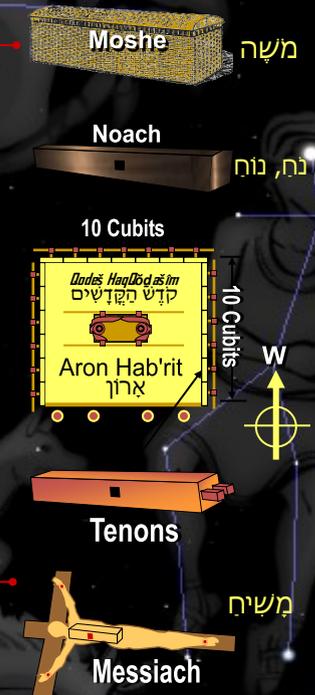

PAN-GAEA

It is speculated that the Earth was smaller in size. Some believe that Gen 1 is a 're-creation' account. This could reconcile a 'Old & New Earth' theory.

THE 4 TYPES OF ARKS

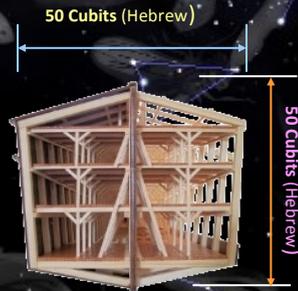

Mirrors 2006 BC when Noah was born:

- A) 120 month x 30 days = 3600 days/365=9.8 years
- B) 9.8 years + 2006 = 2015.8 PASSOVER
- C) 2015 + 3.5 YEARS = 2018.5 PASSOVER

Noahic Covenant

After the Flood, the 3 Sons of Noah's descendants migrated to 3 main destinations. The 3 prominent races' color came as a result of Earth's latitude.
