JOB DESCRIPTION

Preferred experience includes 1 to 2 years in water/wastewater pipeline/field maintenance.

The installation and repair technician is responsible for all pipeline repairs and some installation in our water distribution and sewer collection systems. Work includes backflow checks, hydrant checks, meter repairs, meter installations, meter reading, leak detection, valve repair/installation, valve exercising, and other work as needed for regulatory compliance. Operation of heavy machinery such as backhoes and excavators is required. Work may need to be performed in adverse weather conditions. At times employee may be required to perform confined space entry in accordance with company safety policies.

Position requires, at times, lifting of objects of approximately 50 to 75 pounds.

COMPENSATION AND BENEFITS PACKAGE

• Medical, Dental, and Life Insurance • Annual Leave • Sick Leave • 401(k) and 457 Deferred Compensation Plans • SC State Retirement • Paid Holidays • Training/Education Opportunities • Bonus Program
