

DIMENSIONS OF PARADISE

SACRED GEOMETRY OF THE GARDEN OF EDEN'S GEOGRAPHICAL LOCATION

The purpose of these charts are to illustrate and ascertain the possible geographical location of the Garden of Eden. One of the premises these charts strongly suggests is that the sacred geometry of the Tree of Life - Flower of Life is at the core design and blueprint of what could have been the layout of where the center and the borders of the Garden of Eden geographically were located at in the Middle East. According to the Bible, Humanity's creation started with GOD the SON, Jesus Christ in a Garden and a Marriage and will end in a Garden and with a Marriage with the Return of the Messiah, the King of the Universe, Jesus Christ. The Biblical description of where the Tree of Life is located at gives some geographic clues as to where this 'door' or pathway is situated in the Middle East that leads to the Tree of Life, at least in the sense of where it once was.

If the Dimensions of Paradise geographically and geometrically are consistent with the blueprint of the Tree of Life-Flower of Life, then the 3 cities of Babylon, Ur and a third that is not identified as of yet due to loss of records, could be the 'gate' or pathway to the Tree of Life. Is it any wonder why the Middle East will be the place where it 'ends' as it was the place where it 'began'? Why? This region has and will be the battleground between the forces of Light, Jesus Christ and the forces of Evil through false religions in the region that deny Jesus as LORD and Savior. Aside from oil, these charts strongly suggests that the entire Middle East bears the imprint of the literal geographical area that encompassed Paradise and that Lucifer no longer possesses, it will be his attempt to forcefully challenging the closure of the Tree of Life through Stargates and demonic portals as Nimrod did in Babylon with the towers of sacred geometry and dark magic.

SACRED PATTERNS OF HEAVEN

If the Dimensions of Paradise are such that the area does indeed correspond to the Moon-Earth sacred geometry, then the source of the 4 Rivers can be identified geographically and thus the Earth-Moon pattern could lend viability of where the 'midst' of the Garden could thus be pinpointed. This center point of the Circle or circumference of the whole Middle East would validate the theory that the place north of Havilah in Arabia is where the Trees of the Knowledge of Good and Evil and the Tree of Life were located at. This theory is solely based on the sacred geometry pattern of the Tree of Life - Flower of Life motif. This Earth-Moon pattern also is connected to the Pyramids of Giza complex and the whole of the Nile Delta in Egypt. This study strongly suggests that the same sacred Dimensions of Paradise are mirrored in the Nile Delta in connection to the Great Pyramid. The Nile Delta is geometrically configured as an almost an equilateral triangle from a perspective looking south.

THE ANGELIC RENDEZVOUS POINT

This circle that encompasses the 4 main Rivers of the Middle East, the Nile, Jordan, Euphrates, and Tigris are at a 45 degree angle line bisecting the circle. This line directly intersects Mt. Hermon and the ancient city of Troy in the Northwest quadrants of the all encompassing circle on the map of the Middle East. It was at Mt. Hermon, according to the Book of Enoch, that 120 Fallen Angels descended to Earth at this very spot. They made a pact with each other to take human women as wives and procreate for the purpose of defacing YHWH's creation. The Bible describes or uses words that they had 'left their 1st estate' to explain this condition and circumstance. This has had many connotations from Angels physically leaving their 'posts' as in a military analogy to Angels leaving their form or bodily constitution as in being able to take on a physical manifestation and thus being able to have sexual intercourse and breed with human women. This genetic mixing was one of the reason, according to the Bible why the Earth and all flesh was judged by Noah's Flood. Jesus stated that this would be the same condition in the world just prior to His Return in the Last Days. There would be a genetic mixing of human DNA to achieve the effect of the Tree of Life, immortality.

THE EARTH-MOON PATTERN

If this possible Paradise pattern is transposed onto the map of the Middle East based solely on the geometry of the circumference using Mt. Ararat as a reference point that intersects Mecca as well, and if the Source of the River is in Asia Minor, the Dimensions of Paradise would thus be in exact proportions to the Moon-Earth proportions in terms of geometry and size. If the scale of the Earth to the Moon is used, then the ancient city of Troy would be at a ley-line that demarked the boundary of the beginning of the 'Dimensions of Paradise'. When a comparison of the geographical region of the Middle East to the Moon-Earth graphic are aligned, the location of where the center points of the circles correspond to some amazing points and locations on Earth. For example the Earth-Moon pattern's center that could correspond to the center of where this study suggests the literal center of Eden was near the area to the north of Havilah in Arabia would correspond precisely on Earth to Lake Victoria in Africa.

DIMENSIONS OF PARADISE

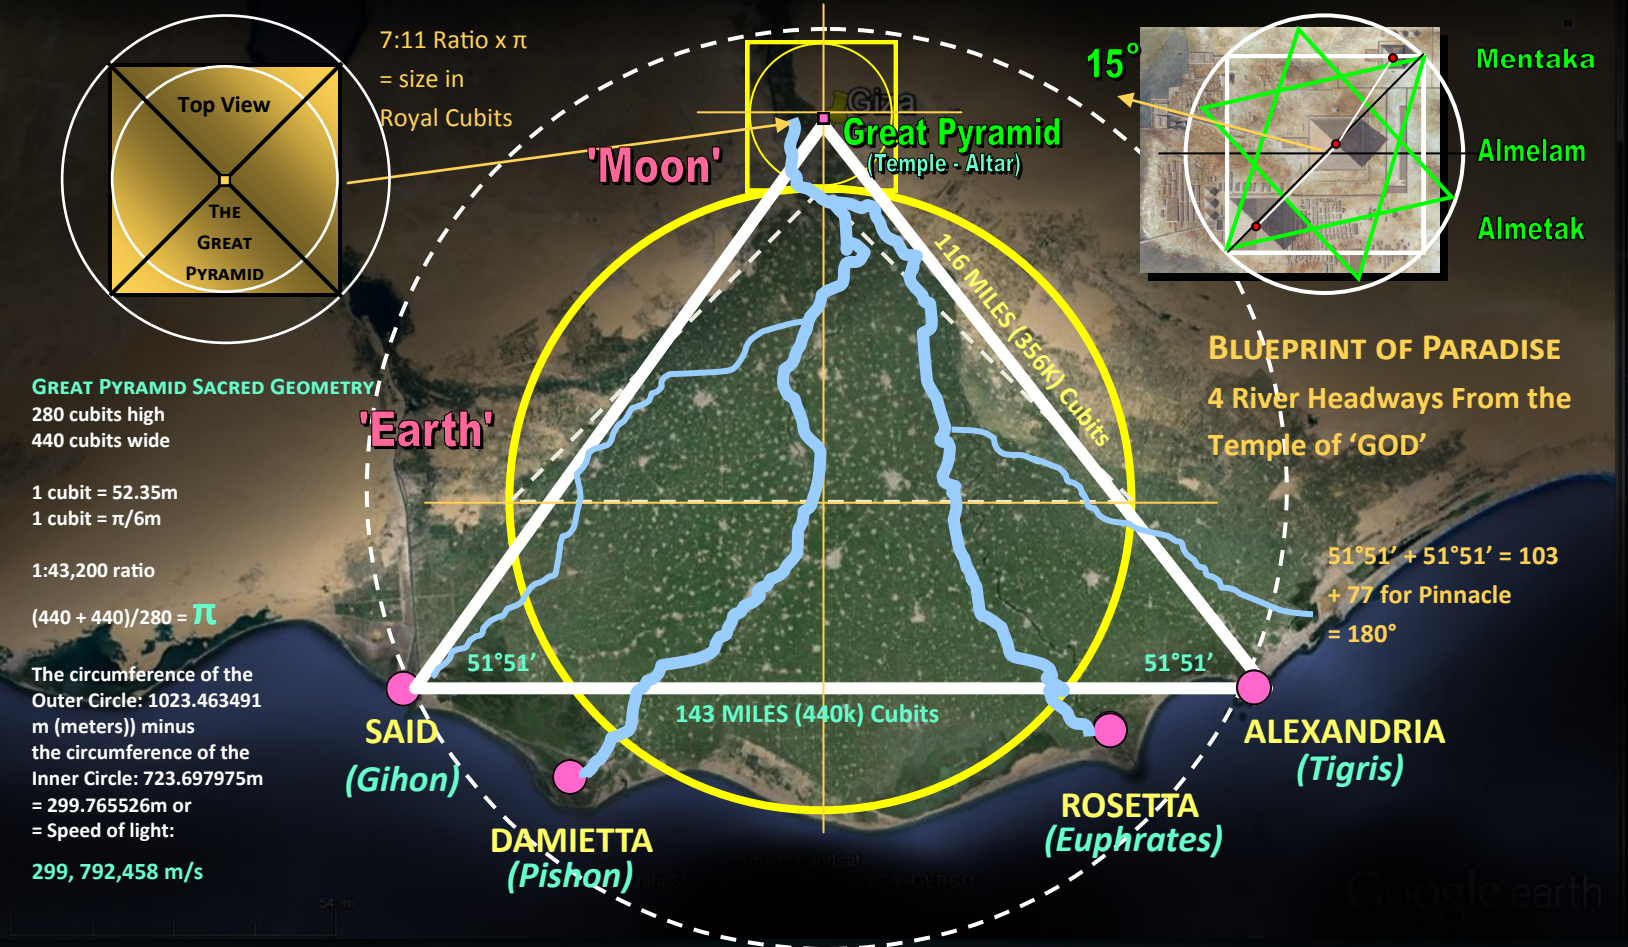

SACRED GEOMETRY OF THE GARDEN OF EDEN'S GEOGRAPHICAL LOCATION

This study thus suggests that this is the case of there being Stargates in the Babylon-Ur-Other city alignment that could likewise be marking the path to the Earthly center of Paradise where the Tree of Life existed. This would make some sense in that the Tower of Babel was more than just making a 'tower' high enough to reach Heaven and become 'gods' but in essence a 'Stargate' that Nimrod sought to open the Tree of Life with. If this theory of where a doorway to the Tree of Life is located at on Earth has any plausibility, it would be in Ur of the Chaldeans, just to the adjacent south where Abraham was called from to leave his parents and city for Israel, the Promised Land. Ur has also this same Orion Belt building structure alignment. Currently there is military air base Tallil Air Base or Camp Adder just to the south of the Ziggurat that is also configured geometrically into a sacred hexagram that perhaps also was acting as a 'Stargate' of sorts in conjunction to the one in Babylon and the undisclosed 3rd location. According to the writings of Zachariah Sitchin, such locations were specifically chosen by the Fallen Angels of Lucifer to have temples erected to them for worship but perhaps there was a deeper association with the gates of Heaven that they know of and thus sought to mirror on Earth. Perhaps such locations will be used again in some form or fashion in the near future in an attempt like Nimrod to forcefully invade the back Gates of Paradise to access the Tree of Life with such sacred geometry and Luciferian magic in an attempt at using such means to break in and unlock the door to the very Tree of Life as Nimrod attempted in Babylon. In essence, just like Christ Jesus is called the 2nd Adam, so too Lucifer is coming to Humanity -in the form of the false Messiah AntiChrist as the 2nd Nimrod.

GREAT PYRAMID IN THE CENTER OF NILE DELTA

The Nile Delta region mirrors the 4 Rivers of Eden that watered the Garden and the Trees in the midst. The geometric configuration corresponds precisely to the Earth-Moon dimensions and size. At the apex of this equilateral triangle that encompasses the whole of the Delta area is corresponds to the Great Pyramid of Giza that functions as the center point of the lesser circle and consequently its angles of 51°51' is exactly that of the Great Pyramid itself. Thus the dimensions of the Earth-Moon pattern correspond not only in exacting proportion to the whole Nile-Great Pyramid pattern but is also in proportion to the theory that such sacred geometry constituted a the Dimensions of Paradise there was a 'temple' of sorts situated in Asia Minor form where the River protruded from a side of a temple or 'throne' that then subsequently branched out into the 4 arms as in an equilateral triangle and watered the Garden of Eden.

The Great Pyramid has been the subject of amazing study as it has encoded in its very stones some amazing attributes of sacred geometry. It is mathematically one of the most perfect buildings ever made. With such a pattern of the Earth-Moon, the Egyptians know of the exact size of Earth and the Moon. They knew the function of phi and phi ratios for example and was aligned exactly due North. Within the dimensions of the Great Pyramid for example sacred proportions were factored in that to some degree are still a mystery as its construction can not be replicated today by the most modern and advanced forms of heavy machinery. For example, the difference between the outer circumference that constitutes the Great Pyramid's corners to the inner circumference of the structure itself from a top perspectives gives the difference in the exact numbers corresponding to the speed of light.

THE GREAT PYRA-

DIMENSIONS OF PARADISE

SACRED GEOMETRY OF THE GARDEN OF EDEN'S GEOGRAPHICAL LOCATION

This study suggests that Eden had a source of the River of Life coming from under the Temple or 'Throne' of GOD, the single River subsequently divided into 4 headways. This is the same case with the Nile River. As the Nile River flows adjacent the Great Pyramid, it then splinters-off into 4 main tributaries to water the 'Garden of Paradise' as it were in the Delta region of Egypt. These 4 Nile River courses correspond to the mouths of 1) Said, 2) Damietta, 3) Rosetta and 4) Alexandria. Geographically, the Great Pyramid sits exactly in the middle between the span of Port Said and Alexandria. The point at which the Nile branches off into the 4 headways give the limit of the large or 'big' circle that envelopes the entire Delta and thus would then determine the circumference size of the 'smaller' circle in which the Great Pyramid is in the midst as if a 'throne' that mirrors the very Throne of the LORD that from which a river flowed out from its side. Incredibly, the circumference of this 'cube' within circle that is pinpointed at Ararat is exactly the sacred dimensions of the coming New Jerusalem, 1500 miles in all directions. For sure there is some amazing synchronicity occurring within these sacred Dimensions of Paradise. For example from the Great Pyramid to the 'Stargate' of Ur, which is the current hexagram designed air base adjacent to the south of Ancients Ur's Orion Belt alignment is exactly 777 nautical miles. The difference with this circumference equals 1500 miles, the very sacred dimension of the New Jerusalem.

Sacred Alignments

A line drawn out horizontally from this Tree of Life pattern center would intersect directly in the west through the beginning of the branching-out of the Nile River just north of the area of the Giza Pyramids. This alignment to the east would intersect the hexagram 'Stargate' configuration of the Orion Belt star alignment that is adjacent to the Ziggurat of Ur of the Chaldeans.

What these 2 points have in common is that both have the Orion Belts star alignment built into the Pyramid and Ziggurat structures themselves, exactly 777 miles apart. Giza's Great Pyramid alignment has a north-south axis and thus renders the Orion depiction as an east-west imagery. This same principle occurs in Ur. The Orion Ziggurat complex is orientated at a 33rd degree angle but the Orion 3-Star temples are at an east-west axis. This would render the Orion depiction to a north-south orientation.

'Tree of Life' EDEN

'in the midst'

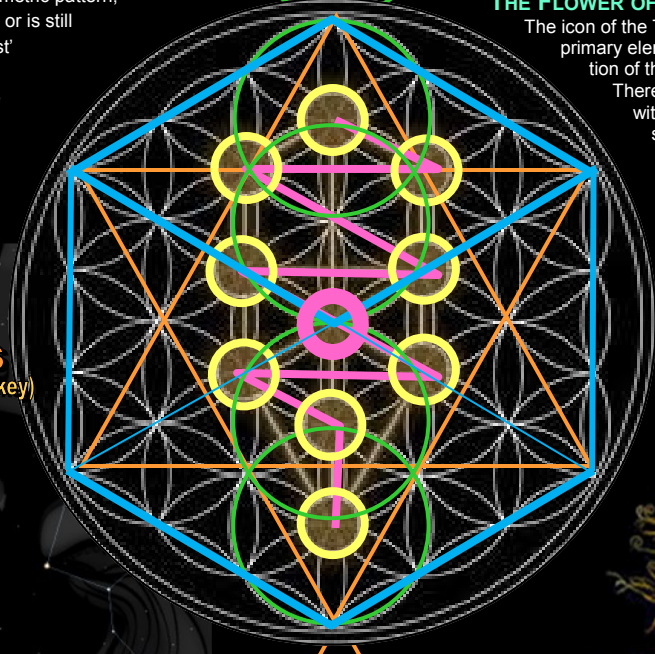

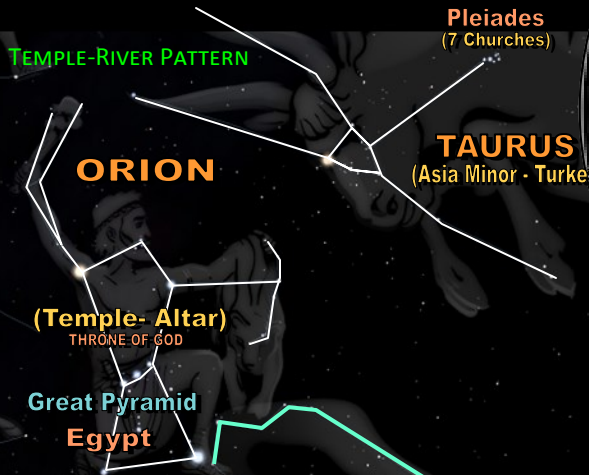

TREE OF LIFE PATTERNS

IF in fact the Garden of Eden layout is in the 'Tree of Life' sacred geometric pattern, then the core or area of where the Tree of Life itself would have been or is still located at if at least not geographically but spiritual will be in the 'midst' geometrically of this circumference in the map configuration superimposed on the Middle East. When this is done, it would place the 'Tree of Life' at the center geographically between the Pyramids of Giza - Ur axis line in the area of northern Arabia. To reiterate the theory and premise of this study, the Tree of Life as the geographic region of Eden had or has a sacred geometric configuration.

THE FLOWER OF LIFE

The icon of the Tree of Life is a representation of the primary elements that constitute the configuration of the dimensions of Paradise itself. There is an overall encompassing circle, within this grand circle, there are 4 smaller circles on the vertical access. These 4 circles correspond to the 4 Rivers that proceeded out of the Throne of the LORD. The smaller size circles, when placed outside and adjacent to the overall large circle comprise exactly the proportions of the Earth-Moon and Great Pyramid-Nile Delta sacred patterns.

TEMPLE-RIVER PATTERN

'LOCATION OF IMMORTALITY'

The motif also produces a rhedron that is incorporated within the grand circle or that of a hexagram. The pattern thereafter produces the different nodes or points like that of the 'tree' with its profound center as being the core or the 'midst'. This conjecture of where the location of the Tree of Life could be is solely based on the geometry of such properties of the Tree of Life and Flower of Life motif.

When this pattern is superimposed unto the circumference that started with the location of where Noah's Ark rested in the Mt. Ararat region, then geographically, the area of where the Tree of Life would be thus corresponds to a very desolate area north of the 'Al Jowf' area in Arabia. It is literally 'in the middle of nowhere', maybe the perfect place to have the Tree of Life be discouraged from being sought or located. Obviously the Tree of Life is not there physically, at least in the physical dimension.

The Phoenix

A river is indicative of 'time' as it has a beginning and end that is marked by a death and rebirth of the Phoenix.

GATES TO PARADISE

The point is that it is believed by many in the ancient world, as now that the Gate of God and the Gate of Man do exist in the Heavens and where placed on the 33rd degree line of the Zodiac. These same sacred configurations were and are mirrored in proportion on Earth at various ancient pyramid sites for example. The geographical area of where the 7 Churches are located at within the area of Asia Minor 'smaller' circles that is alluding to the type of the Throne having a circumference that starts at the 33rd degree angle from the supposed center of the Tree of Life in the midst of Paradise itself.

It is noteworthy to note and that this smaller circle that is correlating to a 'throne' within the area of the 7 Churches in Asia Minor along with the larger circle that has the Tree of Life - Flower of Life motif layout on a map of the Middle East will encompass the very sacred dimensions of the coming New Jerusalem when its outer circle is drawn. In essence, the Dimensions of the coming New Jerusalem are the same and will superpose itself on the very outline of the sacred Dimensions of Paradise that once were and will be again.

DIMENSIONS OF PARADISE

SACRED GEOMETRY OF THE GARDEN OF EDEN'S GEOGRAPHICAL LOCATION

The Book of Revelation specifically alludes to this place as being the place where Lucifer had his throne and perhaps still does. Could it be that after the Fall and expulsion of Adam and Eve from the Garden, so too did the LORD Creator have to withdrawal His presence and Throne associated with that geographic location. Thereafter this place could have been then occupied by Lucifer himself in that he has always wanted to sit in GOD's Throne as 'god'. What is also interesting is that out of all the 7 Churches of Asia, Pergamum had its pagan temples atop a mountain acropolis. Perhaps this geographical location and temples to Zeus that were erected and dedicated to the worship of Lucifer was the closest he could ever get to the Holy Mountain of GOD on the Sides of the North, aside from the 3rd Jewish Temple to come in which he will causes it to be desolate by his abominations.

Out of all the 7 Churches of Asia, only Pergamum was associated with the ancient wonder of the Temple to Zeus. In the Book of Revelation, Jesus Christ refers to this Temple and thus geographic region 'where the throne of Satan is'. Perhaps after the expulsion of Adam and Eve from the Garden and after the Flood, Lucifer wished to usurp such sacred dimensions and claim this former spot where GOD's throne perhaps once had its presence for himself. Lucifer has perpetrated his lie and deception that he is the rightful 'god' and 'creator' and the bearer of the 'light' of knowledge and a promise of immortality 'fire' to humanity. Lucifer seeks to be in place of GOD as GOD alone has the power and sovereignty to bestow immortality. Contrary to Lucifer, the LORD is a righteous and just LORD where there no lie or 'shadow of turning' in Him which Lucifer is not.

When the 7 Churches of Asia are incorporated geographically into this sacred pattern of the Tree and Flower of Life motif, the alignment of 5 of the Churches are location exactly on a 45 degree angle line that runs from the center where the Tree of Life would have been in the 'midst' of the Garden geographically and Mt. Hermon. This study strongly suggests that this alignment is indicative of how the Churches depict the very source of the flow of the 'River' coming from the Throne of GOD at this place and time. From the base of the Square of this smaller circle in Asia Minor, geometrically the River would split in the 4 headways that follow the geometric pattern of the Great Pyramid configuration and degree slope or angle throughout the topographical area to water the Garden of Eden and the Trees in the midst there of, geometrically and geographically in the middle of the large circle. This pattern again, follows the same dimensions of the geometry of the to Earth-Moon and Nile Delta patterns.

The 7 Churches of Asia
