

Workroom System

QUICK REFERENCE SHEET

Features & Benefits:

- By simply pulling on either side of a control cord or bead chain, the operator can quickly and precisely position any shade that weighs up to 30 pounds (14 kg)
- Heavy shades feel lighter
- No more manual ring settings or cleats
- Adjacent treatments are easily set to matching levels
- No more piles of cord
- Trouble-free performance backed by Limited Lifetime clutch warranty

How it Works

Our patented clutch mechanism allows you to raise or lower the shade by pulling on either side of the control cord. This releases the clutch, allowing smooth and easy repositioning of the shade. The clutch holds the shade securely in place when the cord is released. The RollEase system keeps shades hanging level by wrapping individual lift cords around a rotating shaft.

System Options	Compatible Clutches	Max Drop Length	Max Weight	Min Edge Distance	Max Window Width	Brackets	Continuous Control Cord	Bead Chain
Small	CSCLSM	12 ft. (3.66 m)	15 lbs (6.75 kg)	none	unlimited	SNSBKT	Yes	Yes-required when shade is 10+ lbs. (4.5+ kg)
Large	CSCL	12 ft. (3.66 m)	30 lbs (13.5 kg)	none	unlimited	CSBKT	Yes	Yes-required when shade is 10+ lbs. (4.5+ kg)
