## The truth about Billy Meier – "UFO-Billy"

The UFO contact person, Billy Meier, is often attacked by uninformed people who do not have the slightest knowledge of Billy's entire contacts and his mission, about his wherefrom, whereto and why, his tasks and all things that go with it, nor have they ever met Billy personally. This is proven also by the fact that Billy's real and full name, namely Eduard Albert Meier, as a rule, is only familiar to a handful of co-workers, some acquaintances, and the members of the FIGU (Freie Interessengemeinschaft für Grenz- und Geisteswissenschaften und Ufologiestudien). Even fewer people know how Eduard Albert Meier got the name Billy or that his name was put down 10,000 years ago in documents which were preserved, handed down, and still exist now on Earth. The name Billy is not only used by the public all over the world and by Billy's closest associates but often also by the extraterrestrials (ETs).

Unfactual criticism and dishonest people who think Billy's contacts and mission are impossible, defame and accuse him of being a charlatan or worse, and try to ridicule him. However, they are, as a rule, unknowing about the issues and connections and, therefore, they don't have the ability to deliver any realistic and competent assessment of the mission, the contacts, or Billy's person.

In order to give an assessment that is realistic and corresponds to the facts, one has to deal with these matters for many years in a serious, honest and intensive way to get to know the pertinent and multifaceted information, to study intensely the facts, and to get to know Billy. As a rule, this has been the case with only a few closely associated individuals, as well as with several outsiders who publicly announce their positive feelings towards Billy Meier and his contacts. In honest lectures, seminars, radio and TV programs, in films, newspapers and magazines, the "Billy Meier Case" is called unique in the world by well-informed circles. There is probably no other case as richly documented by witnesses' testimonies and material as this one, even though none of the witnesses has ever had personal contact with extraterrestrials. (This privilege was granted exclusively to Billy by the extraterrestrials who come from the planet Erra in the open star cluster of the Pleiaren. They have never had personal conversations or conscious telepathy with any other person.)

Typically enough, the witnesses agree having experienced, seen and heard peculiar, often inexplicable phenomena, which only could be in connection with Billy's contacts. Those eye and ear witnesses by no means consist solely of Billy's friends and co-workers, but also consist of completely unrelated persons, e.g., spectators who took part in a rock music festival in 1976 on the Bachtel mountain near Ettenhausen (between Hinwil and Wetzikon in the Canton of Zürich), from where they witnessed nocturnal beamship demonstrations, etc. But also previous members of Billy's group (which has loosely existed since 1975), who call themselves today (1989) his arch enemies, have to admit that they had phenomenal experiences regarding UFOs and ETs.

What is sure is that Billy himself did not strive for these contacts, rather he was invited by the Plejaren thereto – because of a thousands of years old task. Furthermore, it is a proven fact that the reasons why Billy was willing for these contacts, was not out of pathological craving for profit, publicity, or personal fame, which can be evidenced by his withdrawn lifestyle. The contacts to the extraterrestrials coming from the Plejaren however did not take place for his own pleasure, because behind all this, there stands a huge, worldwide mission which must be fulfilled by many human beings. Relating to this mission many texts have been written, in parts transmitted by higher spirit-forms and also by the Plejaren, the existence and origination of which Billy's enemies have no idea. Partially these texts were written by Billy himself, some upon request by the Plejaren. All these texts, beginning with the contact reports right up to the latest work, the OM, (up to 1989/2014 a great many of other writings [books, booklets, Spiritual Teaching, etc.] have been and will be published) can be obtained from FIGU, Semjase-Silver-Star-Center, Hinterschmidrüti 1225, CH-8495 Schmidrüti/ZH, Switzerland; please see actual price list.

Many years of experience with all kinds of people have shown that those who try to discriminate against Billy and call everything into question, are obviously enviers, pseudo-scientists, sectarians, fanatics, schizophrenics, or simply slanderers. In particular, they seem to be people who, because of some strange weltanschauung, political or religious motivations, do not want the truth to be true and therefore are willing to trample the truth into the ground, to suppress it and to defame it, even if it means going over dead bodies, and to boundlessly besmirch and destroy the reputation of another human being.

by FIGU

## Interview of the «Magazin 2000» with Billy, November 20, 1988

When I, Billy Meier, am supposed to give an answer and explanation concerning the Plejaren, their life, philosophy, life-conduct, and mission, it is absolutely essential to mention the Creation, its laws and recommendations, as well as the ancestors of the Plejaren, the old Lyranians/Lyraner and Vegans/Weganer, and also the human beings of Earth of olden days and modern times who had been influenced by them, as well as myself, i.e., my spirit form, which is – as power, middleman, and proclaimer – inseparably united with and closely related to the ancient and contemporary human beings of Earth, Lyranians/Lyraner, Vegans/Weganer, Plejaren, and the spirit level "Arahat Athersata".

The answers and explanations cannot be given in a brief, banal, superficial, meaningless, fatuous, bland and colourless way as it would be possible and is the case with supposed talented ones, those accompanied by spiritual leaders, with apostles, proclaimers of god, Jesus and angels, chosen ones, channellers, and other supposedly supernaturally capable ones, enlightened ones, seers and prophets and salvation bringers by their own blessing, and as is also the case with would-like-to-be-contact-persons (99.97% of all assertions hereof are only swindle, lying and deception, schizophrenia and the like, because only 203 of 1 million of the assertions hereof are according to the truth, and also these 203 only have impulse-contact in for them unconscious form), who claim to have contact with extraterrestrial life forms or higher spirit forms, yes even with god, saints or Jesus Christ, with those of the other world or other dimensioned ones. They spread all these meaningless, wrong, banal, and delusional supposed news, messages, prophecies, threats, and incredible stories to their lowly intelligent and misguided believers.

The mission of the Plejaren – myself as middleman and proclaimer – the Lyranians/Lyraner and Vegans/Weganer, in connection with the human-beings of Earth and the all-embracing Creation with its laws and recommendations, comprise a horrendous knowledge of material, spiritual and very compact form. It simply cannot be pulled out of its fundamental connections and trivially be told or even be explained in individual items. This knowledge of the entire mission and history involving the Plejaren, Lyranians/Lyraner, and Vegans/Weganer, human beings of Earth and myself, i.e. my spirit form, as well as the Creation and its laws and recommendations, etc., is so compact and extensive, that every single question can often only be answered comprehensively in connection with other questions. If there is not given attention and enough consideration to this, then inevitably misunderstandings, misapprehension, irrationality, chaos and falsifications will occur which are detrimental, contradictory, destructive and irrational to the truth and go directly against it.

1st Question:

Ozone holes, climatic catastrophes, earthquakes, hurricanes, AIDS, the nuclear threat ... the situation on Earth appears to be threatening. What do the Plejaren say to all this?

5th Question:

According to the extraterrestrials, how can we still save Earth here and now?

Answer:

Earthquakes: Not all earthquakes should be blamed on humankind and its applied technology; many are of purely natural origin and are connected with the natural developmental cycles of Earth, even though the human being must be blamed for triggering some devastating earthquakes, for instance through the construction of artificial lakes, overexploitation of oil and gas, as well as through the construction of gigantic cities.

Hurricanes: Tornados and hurricanes are closely connected to climatic changes often associated with the human being's mismanagement against nature, e.g., the cutting down of entire forests, the construction of river barrages and artificial lakes, the destruction of cultivated land through harmful chemicals and poisons, the overfertilisation and clearing and devastation of land, etc., A-bomb tests, the activities and their consequences of nuclear power plants, the burning of fossil energy sources, and the utilisation of modern chemicals and poisons.

*N.B. This translation contains errors due to the insurmountable language differences between German and English*

**Ozone Holes:** The destruction of the ozone layer is caused by the same human carelessness (Schlamperei) and bungling, mainly through the usage of fluorinated hydrocarbons, nitrogen oxide, nuclear radiations, and through released exhaust gases etc., from the explosive engines (more information can be found in the Plejadisch-plejarisch contact reports from 1975, which already contain a warning by the Plejaren regarding the destruction of the ozone layer). The growing destruction of the ozone layer, and the resulting dangers, can only be resolved through a rapid global agreement to prohibit the production, use and freeing of all substances, destroying the ozone layer.

**AIDS:** The origin of the rampantly spreading disease AIDS lies in Uganda/Africa, from where the disease had spread to Haiti before finding its way to the whole world through sodomistically[1] perverted homosexuals. AIDS came about through sodomistical actions with long-tailed monkeys, which naturally carry the AIDS virus in themselves without being detrimental to them. The inception and transmission occurred through acts of sodomy and later also through sodomistic-homosexual activities. The Plejaren have explained that a cure for the disease may only be found by medical researchers on Earth when it is almost too late, as the disease will have spread worldwide by then. They themselves have no medication for this exclusively earthbound disease.

**Nuclear threat:** The nuclear threat is a war-technical insanity of the human beings of Earth and in every sense against the Creation and nature. Moreover, it is the monstrosity of schizophrenic, insane, war-game addicted fools and psychopaths without a trace of responsibility. The military, as well as the peaceful use of nuclear energy, have endless dangers inherent in themselves which the human beings of Earth will not be able to control for a long time to come. Furthermore, radioactive radiations are released through the radioactive decay which are still completely unknown to the earthly scientists of nuclear physics and which they cannot even dream of.

**The Situation of Earth:** The situation of Earth is threatening, and indeed in many different aspects: concerning the overpopulation, the military affairs and arms industry, the contamination of the entire world through poisons of all kind and radioactivity, the felony, might politics, drug addiction, irrational religions, earth-wide mismanagement in all areas, financial exploitation, etc., misuse of chemicals and poisons, terrorism, racial hatred, human trafficking, prostitution, anarchism, irrational evocation of the dead, spirits and demons, acts of war and revolutions, etc., etc. What can be done against this? First and foremost, an immediate reduction of the earthly human population, through a humane form of a worldwide stop in births, with a subsequent follow-up of permanent birth control.

If no stop in births and no birth control is initiated to keep the number of human beings on Earth in bearable limits (529 million would be the normal number of inhabitants on Earth), the problems will increase infinitely, and one terrible thing will entail the next one because the human population grows continually and likewise the problems and become unsolvable. At the same time, the elimination of various damages, according to their cause and effect, is of irrevocable necessity and a most urgent requirement.

The Plejaren themselves suggested that the following important measures be taken to end the destruction of Earth:

- As mentioned, for several years there must be an absolute stop in birth followed by a permanent birth control.
- Immediate end of ALL exploitation of the earth, including the exploitation of the forests and the devastation of entire landscapes, etc., until a bearable, acceptable level for the earth has been reached.
- Stop of all nuclear tests.
- Stop of production for the abuse of certain narcotic drugs, other drugs and nature- and life-damaging chemicals and poisons and every misuse.
- Destruction of all existing nuclear power stations.
- Stop of mismanagement of any kind.
- Furthermore abolition of wrong politics and irrational religions in the current inadequate forms, which are

*N.B. This translation contains errors due to the insurmountable language differences between German and English*

against nature and the Creation.

- Formation of a global unity government in a unity-democratic form.
- Dissolution of all war-directed military blocks, and of all political and military secret services.
- Dissolution and prevention of all war activities and revolutions, etc.
- Abolition of the torture and the capital punishment and of all other life- and Earth-burdening and -affecting badnesses and shortcomings of all kind.
- Formation of a worldwide and peoples-connecting and peoples-protecting troops of order and of security, consisting of members from all existing peoples and races on Earth.
- Global spreading of the laws and recommendations of the Creation and the learning and following of the resulting mode of life which is in accordance with the Creation and therefore also human and human-worthy.
- Worldwide furtherance and realisation of the compensation of all the created damages caused to the land, forests, meadows, water, atmosphere, plants, human beings, animals and other creatures, and microorganisms.

2nd Question:

Why are the Plejaren interested in the destiny of Earth?

Answer: The Plejaren are interested in the destiny of Earth because they feel responsible for the past misdeeds, irrational teachings and irrational religions, misguidance and other badnesses which their Lyranian/lyranischen and Vegan/weganischen ancestors presented and inflicted to the earth-born inhabitants in the early days of the development of the human being of Earth. Already in those early days, the human beings of Earth joyfully accepted the irrational teachings of the extraterrestrials and perfected them licentiously and self-willingly, in their absolute own responsibility up to the point of ausartung, as this ausartung is in danger to grow out of control in all kinds of fields. Therefore, the blame cannot be pushed solely onto the extraterrestrials, but must mostly and explicitly be searched for in the complete willingness of the human beings of Earth, because they invented and over-fulfilled the measure of all terrible things, whereas the extraterrestrials only brought the bad things of the delusional leading. Nonetheless, the Plejaren feel responsible for the wrongdoing of their very early ancestors, as well as for the incurring ausartungen of the human being of Earth who has opened the floodgates to all this insanity through his/her conscienceless willingness and imperiousness, and until now has been wallowing in terrestrial delightfulness and pleasures ever since.

3rd Question:

You had your first contact with extraterrestrials at the age of 5; afterwards you had been living for a long time in India, as well as other places; apparently you had been prepared for your task. Why were you quasi chosen for it?

Answer: In 1942, my first contacts with extraterrestrials began at the age of 5, with Sfath, the grandfather of Semjase, the Plejaren female. Initially, I learned a lot through him and with him regarding the spiritual teaching and existence and function of the creational laws and recommendations, as well as the use of the spirit-telepathy, so in the sequel the communication between Sfath and myself became possible in this way. As of 1944, during many stays in his beamship, Sfath explained to me many things and informed me about important data concerning many knowledge-fields, spiritual science, history, creational teaching and evolution-teaching, occurrences and facts, etc., which I had to learn and store in my memory, and indeed mostly through electronically induced deep hypnosis. He explained to me at a later date that due to our mutual efforts my understanding had grown to that of a 35-year old person, even though in reality I was only 7 years old, and that this knowledge would still increase manifold in the coming years. I was told that I would have – amongst all human beings – the highest degree of knowledge concerning the creational-natural spiritual connections. (It

*N.B. This translation contains errors due to the insurmountable language differences between German and English*

must be understood that this does not refer to material-intellectual knowledge, therefore not to book- and school-knowledge and not to pattern-knowledge, but it refers to the knowledge concerning the spiritual teaching and spiritual science, the existence of the Creation and the existence, effect and use of creational energies; the creational teaching and teaching of the origin, up to the evolution-teaching and the all-great-timely Absolutum-teaching.) Also in later years I was deliberately taught and prepared for my task – namely the fulfilment of the Mission and the contacts with the Plejaren – in many-sided kind and wise and in many countries of Earth and in all kinds of knowledge-fields of spiritual and physical nature through different persons of terrestrial and extraterrestrial origin.

Thus, the necessary requirements and capabilities for a senseful cooperation between me and the extraterrestrials were created and renewed in accordance with previous lives, as this has been handled for the Mission since time immemorial. Furthermore, the Plejaren are only able to maintain personal, i.e. physical contacts with those human beings of Earth who have worked their way up to such a high consciousness-based level of knowledge, as is necessary for a physical and telepathic contact and to be able to communicate sensefully with the consciousness-based and also physically very highly developed Plejaren. So I am the only human being on Earth who is able to maintain physical and telepathic contact with the Plejaren and other life forms of the same evolutionary level. No other human being of Earth besides me is able and capable of doing so, not even those whose spirit-forms originally did not come from Earth.

This is the reason why the Plejaren began to contact me early in my childhood to prepare me and make me capable for my forthcoming contacts with them, because my spirit form had already been voluntarily active in human bodies as teacher, proclaimer and prophet for millions of years in the Lyra-Vega systems and on Earth. Since primeval times my spirit-form has – returning into the material sphere from a highly spiritual level ("Arahat Athersata"-level) – carried out prophetic functions, already on LASAN and other planets of the Lyra and Vega systems, in which case my spirit-form, under the former name NOKODEMJON, already then committed itself to fulfil a necessary prophetic mission and function. This commitment – which includes as mission the tuition of the human life form and the truth-bringing of the Creation-teaching, the creational laws and recommendations and the spiritual teaching etc. – first extended on the human beings of the Lyra and Vega systems, and later also on the human beings of the planet Earth and therefore also on all those many million successor-personalities (with extraterrestrial spirit-forms) of those extraterrestrial immigrants who came – willingly or unwillingly – to Earth from the Lyra and Vega systems and from the destroyed planet Malona in the SOL system.

4th Question:

What do you think of the legend that 3 million years ago 144,000 Plejaren souls incarnated on Earth to further the development of this planet?

Answer: This legend has no truth in it whatsoever. The first extraterrestrials who came to Earth were not Plejaren but human beings from worlds which exist in another dimension in the area of the Lyra and Vega systems. The first Lyranians/Lyraner, together with the Vegans/Weganer, came to Earth for the first time 22 million years ago. Their stay here was very brief and they took off to other star forms and planets, and their further history remains mostly in the dark, although shock troops came to visit Earth every now and then.

Approximately 389,000 years ago, several million Lyranians/Lyraner and Vegans/Weganer again took off from their home worlds, got into the space-time configuration of our dimension, and came to Earth where they mixed with the earthly human life forms, created descendants in a normal kind and wise as well as through genetic manipulations by genetic engineers. Through the normal procreation, lyranian-earthly mixed descendants came into being, whereas through the genetic manipulation human-animals and animal-humans as well as giants, titans and all sorts of other creatures were created. Over the hundreds and thousands of years these creatures were displaced again or died out because they were not procreative or because the conditions of life were deadly for them.

These many millions of Lyranians/Lyraner and Vegans/Weganer, who had left their home worlds, were headed by 144,207 leader personalities and sub-leaders, etc., who ruled over their followers in a rather hierarchic form, and this might they also transferred onto the human beings of Earth, with whom they had come together to create descendants of various kinds. These 144,207 leader and sub-leader personalities were actually

*N.B. This translation contains errors due to the insurmountable language differences between German and English*

ringleaders who were then decisively responsible that lots of misdeeds, irrational teachings and irrational religions could come up and take root on Earth and amongst human beings. But the leaders not only brought terrible and erroneous things and misdeeds to Earth against their better knowledge, but also many good things of the handicraft, the philosophy and the thinking, the medicine and technology and many other things. Therefore these 144,207 spirit-forms of these ancient Lyranians/Lyraner and Vegans/Weganer were not reincarnated on Earth from another planet in order to further the development of this planet and they were also not Plejaren, but simply Lyranians/Lyraner and Vegan/Weganer. It was much later that the descendants of the splinter space-traveller groups of Lyra and Vega called themselves Plejaren – these splinter groups stayed away from Earth, while the other travellers from Lyra and Vega settled on Earth –, after suitable habitable worlds had been discovered and colonised in the area of the Plejaren. These worlds, however, just like the Lyranian/lyranischen and Vegan/weganischen planets, are located outside of our space-time configuration, so therefore in another dimension, a mere fraction of a second off our space-time configuration. On the Pleiades star cluster in our present time and space there exists no life whatsoever because the Pleiades are still at a very early stage in their development.

Of course the immigrated Lyranians/Lyraner and Vegans/Weganer, as well as the 144,207 leader personalities remained on Earth. Consequently they died over the course of time on Earth, in order to incarnate again and again over all the time since then into human bodies on Earth, however, without any memory of their former lives, as this is given for all human life forms through creational laws and recommendations, so that there will be no chaos and confusion in the human thinking and feeling. Nonetheless, all these fallible ones who had come to Earth, were unified by an Jschwjsch, and were taught all the necessary creational laws and recommendations as well as guidelines, etc. through which the fallible ones, in particular the 144,207 ringleaders, agreed to make good again in later incarnations the damages wrought. At the same time, they created a codex for themselves and all followers, through which they should suffer from severest measures if they break from their oath of compensation and the thereof resulting mission. This codex has been created for all the future times until the day the compensation will be completed. (In the meantime the codex has been fulfilled and is, therefore, out of function [remark 1998].)

Therefore, the 144,207 human beings, besides countless followers, are integrated into this codex up to the current time and far beyond into the future, in order to fulfil the mission of the compensation. In the new time, the bearers of the codex are gathering anew, lead and guided through the impulses of the codex becoming efficacious in them, through the teaching of the creational laws and recommendations, and through the help of the Plejaren, who feel themselves jointly responsible for the fulfilment of this mission. I, Eduard Albert Meier, called Billy, act as middleman between the Plejaren and the bearers of the codex as well as the majority of the human beings of Earth. In ancient times, I, as human being with a higher developed spirit-form, offered myself voluntarily for this mission and task and received an appropriate education. It is necessary to mention, that out of the fact of the former 144,207 ringleaders and their history the wrong christian-religious and sectarian legend of the supposed 144,000 chosen ones resulted, i.e. was invented. This was accomplished by irresponsible sectarians in order to bind therethrough believers and other misguided followers to wrong religions and other cults and sects, in order to be able to exploit them, in every possible form, to the last drop of blood.

6th Question:

For the Plejaren there is a difference between religion and spirit-knowledge. What do they, the Plejaren, understand by spirit-knowledge, what do they believe in, what creational-natural consciousness-way do they go and what do they practise?

Answer: The life of the Plejaren, their thinking, feeling, perceiving in a fine-spiritual wise, and acting, etc., is only and exclusively directed towards the knowledge about the existence of the Creation and its truth in all things, towards the fulfilling of the true laws and recommendations of the Creation and its guidelines. Their entire efforts go on the sheer tracks of the knowledge, the love, truth, and wisdom, and not on questionable paths of a macabre, enslaving religious belief robbing people of their spiritual freedom, and reeking of carrion, badness and falseness.

Religions, in the sense of the current understanding of the human beings of Earth, are strange to the Plejaren. A creator god, or whatever the various terrestrial cult religions call him, is completely far-from-the-truth and an

*N.B. This translation contains errors due to the insurmountable language differences between German and English*

abomination to the Plejaren. They cannot understand, why the human beings of Earth have not yet succeeded – despite all the efforts in that direction – in bursting the cult-religious chains to finally taking upon themselves and in their own responsibility and initiative the foreordination of their races – in their own upbuilding efforts and according to creational guidelines – in order to start with the long overdue responsibility; namely with the true evolution, in order to give enough consideration to the laws and recommendations of the Creation.

The life-way of the Plejaren goes straight-lined through the values of an enormous, creational-guidelines-determined, spiritual and technical knowledge in wisdom and ability, hardly acquired by themselves. Acquired through the truth of the Creation, through the power of the spirit and through the creational laws and recommendations, in their following and turning to all things in creational-pleasing pure love and with the powers and wise advice of their JHWH (Jschwjsch); through all that, they have been able to keep the definitive freedom amongst their peoples for over 50,000 years. Therefore, the Plejaren have been living a creational-natural determined life for a very long time, and they vehemently reject the religions in an earth-human cult-sense as illogic, contrary to the creational volition, wrong and consciousness-enslaving. Their philosophy is that of the universal truth of the Creation and of the life of the Creation, and it is solely and exclusively directed towards the truth of the existence and the BEING as well as the laws and recommendations of the Creation, which in no kind and wise can be put on an equal footing with a godhead. As the highest power, the Creation manifests the universal consciousness and the spirit of the spirit, all truth, wisdom and love, all logic and the laws and recommendations and energies of the life, of the BEING and the all-timeliness. The Creation as universal consciousness, is the origin of the life of all creations in its Creation-realm, so therefore in its universe, which however is a universe of 1049 further different universes, which exist in endless number, in endless space, and in endless time, in the highest Creation-form – the "Absolutes Absolutum".

Religion as the human being of Earth knows and practises it, in form of his/her worship of god, worship of saints, and belief in gods, is an abomination to the Plejaren. They consider this form of religion something that is at all times unprovable and contradicts all true and logical foundations of the creational laws and recommendations and the rationality and the intellect and is built up on a blind belief based on cult activities that are strange to the Creation, as well as irrational teachings, lies and falsifications. Religion in the sense and understanding of the human being of Earth is completely against, strange to and breaking the true and primal Creation-teaching and manifests a deprivation of the consciousness-based freedom of the human being. So religion also represents a brutal, felonious and exploitative enslavement of the human consciousness, up to the complete dependence, bondage and lack of will, all the way to the uncontrollable fanaticism and insanity, pathological demonic obsession and complete irrational mental dumbing down.

Creational consciousness-based life of the human being means – expressed in more understandable words – a conscious, creational-natural life of the human being or the life in the spirit in recognition of the Creation and following of its laws and recommendations. This alone is also the only correct line which the Plejaren tread regarding a philosophy of life and a creational directed mode of life which must be the final culmination-point for the human being of Earth as well. Spiritual life of the human being or life in the spirit means, that a life form shall direct his/her thinking, feeling and acting and his/her whole life solely and exclusively on the fundamental truth of the spirit and therefore on the Creation and its laws and recommendations alone. Creation means love, life, spirit, truth, wisdom, rationality and intellect, built upon creational laws and recommendations, which are valid and absolutely unchangeable for the all-great-timeliness.

Only this life form who recognises the true knowledge about the Creation and the therefrom resulting spirit as well as the creational laws and recommendations connected with it, makes them its own and follows them, this life form alone lives rightly and according to the Creation. It means that this life form lives in true knowledge about the truth and with the truth of the Creation and the spirit, in fulfilment of the creational, natural laws and recommendations which are of universal validity, without any irrational and wrong belief in illogical belief-forms that are against rationality and intellect.

7th Question:

With your name, Mr. Meier, one associates, particularly in the USA, the debate concerning your fantastic photos and films. However, only a few people are inquiring into your message. What has gone wrong?

*N.B. This translation contains errors due to the insurmountable language differences between German and English*

Answer: The fact that something has gone wrong with the spreading of the Plejaren messages is only part of the whole badness, because parallel to it, also the real mission of spreading of the truth concerning the Plejaren, Lyranians/Lyraner, Vegans/Weganer and human beings of Earth and especially the teaching of the spirit, the Creation-teaching, the existence of the Creation and the creational laws and recommendations and guidelines as well as the messages and transmissions out of high spirit-levels fell so much behind, that everything only became known on the quiet. The actual source for the concealment of the full facts of the truth and the actual mission lies in the first place by the sensation-hungry journalists of all kinds of public media who, as a rule, do not dare to publish the truth and are afraid of being attacked, and who have – since the beginning of the mission – only always taken an effort to make, out of the circumstances of the ufological facts, a one-sided ufological sensation, without mentioning the actual important Mission connected with it. Therefore the true Mission, which involves the existence of the UFOs and extraterrestrials, was kept secret towards the public, because solely and exclusively with the UFO-hype, sensational stories of all kind in negative or positive form could be found a buyer for. This hasn't changed up to now, because the public media is still directed towards sensation, however not towards the spreading and naming of a Mission and truth, which – as the most life-essential substance for the human life – shows a universal-creational philosophy concerning the existence of the Creation and its laws and recommendations, and the fundamental requirement, that each life form, so also the human being, solely and exclusively is – in every respect – self responsible for all and everything what he/she thinks and does, and that he/she can only then live form-fulfillingly and exist in a right mode of life, if he/she accepts the existence of the universal all-embracing Creation as Universal Consciousness and – in following and making use of its laws and recommendations – lives and directs his/her life accordingly.

In second place concerning the going wrong of the spreading of the truth of the mission and the messages etc. can be explained that, unfortunately, at the beginning not everything went smoothly, which however could be solved as time went by.

The journalists of the public media only made full use of the facts about the ufological concerns related to the extraterrestrials as well as my verifiably unique film, slide, metal and photo material etc. Scientific analysis were made about my whole material as for films, slides and photos, which I was allowed to take, and for metal samples which I received from the Plejaren, in which case the result of the analysis was that my whole material is absolutely real and no falsification, and that they are to be classified as unique in the world, which gives a hard fight especially to sectarian and pseudo-UFO investigators of all kind, above all in Germany, Switzerland and America, and doesn't fit in no way their wrong concept which is against the truth. According to the positive and truth-proving analysis of my films, slides, photos and metal samples etc. two large size illustrated books in colour with lots of my beamship-photos and corresponding texts were published and spread over the whole world, however in a purely sensational presentation, without mentioning the actual mission, the spiritual teaching-based direction and the writings, books and messages connected to it. So everything was presented and sensationally exploited in a purely ufological way, though which the importance of the Mission was completely ignored, because solely and exclusively the UFO-hype was sensation-giving enough, in order to be able to make profit.

8th Question:

You have many enemies, also and particularly in UFO circles. What do they have against you?

Answer: The circles of today's so-called ufologists and supposed contact persons consist mostly of human beings who do not work with the ufology and the truth within a reliable framework, rather they practise a pseudo study of ufology, falsely pretend contacts in conscious lie, in irrational delusion or irrational deception, with which they nourish and satisfy their lust for sensation, their sectarianism, their envy, their know-it-all attitude and boastfulness, their self-confidence, their inferiority complexes or craving for recognition, and often enough also their megalomania. In addition to these, there are all those supposed talented ones, the ones guided through spirit leaders, the representatives of god, saints and Jesus; apostles, proclaimers of god and angels; chosen ones, channellers, and other supposedly supernaturally talented ones, enlightened ones, seers, prophets, and saviours by their own blessing, etc., who populate the world in masses and who manage to charm, exploit those with low intelligence and the credulous ones of Earth and lie to them. Truthly, 99.9797% of all claims in this regard – including supposed contacts with UFOs and extraterrestrials, those of the other world and other-dimensioned ones etc. – are based on conscious swindle, on lie and deception or on pathological chronically or sporadically occurring irrational schizophrenia or similar delusion-conditioned machinations.

*N.B. This translation contains errors due to the insurmountable language differences between German and English*

Actually, of 1 million claims concerning contacts, being enlightened, being chosen, transmittance of messages, and so forth, only 203 (two hundred and three) correspond to the truth and reality, whereas 999.797 of 1 million claims are swindle, lying and deception, cheat, delusion of all kind, or the product of pathological chronic or sporadic schizophrenia. 203 out of a million does however only mean that this number would be – in the best case – possible at the highest evolution-state, and then also only in impulse-telepathic form, therefore those concerned wouldn't have any knowledge about their contacts/connections as a rule. So there exists today – in 2014, on the Earth of a humanity of 8.5 billions (8.5 thousand millions) terrestrials, who are still rather underdeveloped in their consciousness – only one single real contact person to the Plejaren. (The other persons – except myself – have died. Remark 1998.) Most of the human beings, who behave as my enemies, come from circles of wannabe ufologists and supposed contacts of all kind, from know-it-alls, envious, sectarians and boastful ones etc. They begrudge and envy me my contacts with the Plejaren and they are of the opinion that they themselves would be far more suitable to act as contact person than I. However, they are not only badly informed about myself and my contacts and the related mission, and not at all about the existence and activity of the spiritual levels, powers and laws and recommendations, as well as about their truth and mode of functioning, but simply all too often not at all. Let alone, that they do not have the slightest idea regarding the true existence of the Creation and its laws and recommendations as well as the connection of the Creation, the spirit and the diverse levels and life forms. They do not consider that my contacts not only entail fame and prominence as they assume and what they are inconsiderately and megalomaniacally lusting for, but that this fame and prominence is also connected with all kinds of terrible unpleasantness, e.g. with altogether 22 (as per 2014) murder attempts, which have been carried out against me so far. Furthermore, these human beings do not expect that they could be treated with hostility, as they are now showing towards me. Least of all they consider that I not only had to fulfil the mission over many years and decades, but also in many lives before and was taught in strict and hard form, and that I had to educate myself for decades in hardest work and also with the help from outside in order to take the Mission over and bear and fulfil it at the appropriate time. Primarily they only see that they themselves cannot play any role in any wise in connection with my mission. On the one side this stirs up envy and hatred in them, and on the other side they are frustrated because they cannot find an audience on a large scale for their irrational and wild speculations and sectarian delusions of the brain. Typically enough, in all those circles I have no enemies where they deal with ufological concerns and the creational, universal truth and teaching in a sincerely interested, honest and active wise.

Furthermore, they also envy my verifiably world's best UFO photographs (beamship-photos), films, slides and metal as well as crystal samples, etc., and call them a falsification. This however always only by pseudo-scientists, envious, dishonest critics, know-it-alls and those who do not want the truth to be true and to accept it in no wise, out of sectarian, religious, political, pseudo-scientific of whatever reasons ever. A further point of the enmity against me is found in the argumentation that I unmask swindlers, liars, schizophrenics, psychopaths, and cheaters etc. in questions of the UFOs, contacts with extraterrestrials, otherworldly ones and other-dimensional ones, as well as channelling etc. by "talented ones" and other super-freaks; so I distance myself from these people and do not hesitate to mention my knowledge and my experiences concerning my cognitions about them clearly and make it openly known. And now, naturally, all swindlers, liars, cheaters, self-deluded ones, psychopaths, insane ones, schizophrenics and other "talented ones", chosen ones, enlightened ones etc. pretend – as my experience proves – , that they of course belonged to those 203 of one million asserting ones, who told the truth – and at the same time they do not consider, that they therethrough accuse themselves all the more of lying and also manifest it.

9th Question:

Many famous people came to see you, such as Shirley McLaine, Hermann van Veen, and Elisabeth Kübler-Ross, among others. What did they want to know and what did you give them to take along?

Answer: The reasons why well-known people visit me are different from one person to the next. Some people want to see me because they hope to have their personal opinions and philosophies confirmed, while others come out of an honest, personal interest for the mission, the teaching, and contacts, etc. Others visit me hoping they can connect their sectarian and wrong assumptions with the true spiritual teaching, in order to gain more importance for themselves towards third parties.

Shirley McLaine was at the the Center for a 5-day visit, i.e. from October 2 to October 7, 1981, accompanied by Solo, a dark-skinned man, and with Lee Elders and his wife. During these days she monopolised me and

*N.B. This translation contains errors due to the insurmountable language differences between German and English*

questioned me daily for several hours concerning my mission, the Creation-teaching and spiritual teaching, universal philosophy, and spiritual and creational laws and recommendations as well as their mode of functioning and effect etc. Everything that we discussed and all my tuition she wrote down very neatly and recorded everything on audiotape. In her explanations she wrote about it, and later on – obviously encouraged through my tuition and the revelations rich in substance – she published at least her book *«Out on a Limb»*. However, she no longer kept to the given truths, information and tuitions in any wise, instead, she arbitrarily made blatant changes and falsifications to the teaching and the truth which no longer have any connection to the truth of the Creation and the spiritual teaching, but comply with pure figments of the imagination and derive from sources, that are having a real struggle with the truth and who live in complete unknowledge of the truth because they are based on widespread irrational teachings. Although Shirley McLaine apparently didn't feel so well when stating her twisted assertions, she nevertheless didn't have the courage to call everything by its right name and to describe her experiences as they in reality happened. She falsified my name and transferred the story and the talks, my tuition and given teaching fantasy-rich and without hesitation to South America, gave me a wrong, but common name over there, and played up my talks with her as well as the given tuition and teachings to an untrue and strange story. Apparently driven by a pathological craving for fame beyond death, she fantasised a knowledge and supposed information, tuition and teachings about the true spiritual teaching, the reincarnation and about former lives etc., which are in no wise – not even roughly – derived from the creational-natural truth and do therefore truthly not correspond to the truth. She didn't get the slightest hint from me on previous lives concerning her person or spirit-form. Such claims are pure invention.

Elisabeth Kübler-Ross (a well-known doctor from Switzerland who lived in the United States – translator's note), who visited me for one afternoon with her sister, is tending in a similar direction as Shirley McLaine. Elisabeth Kübler-Ross came to me with a preconceived sectarian conviction regarding god and the reincarnation and the life after the death, etc., like Shirley McLaine, and apparently she was hoping I would corroborate her belief in her own predominant form. As it seemed, she was trying to connect her wrong, strictly religion-conditioned and untenable conclusions concerning previous lives, life after death and a spirit-guide who is leading her, with the spiritual teaching, in order to get a solid foundation for her ghost stories. An attempt that failed miserably, because the truth is and remains the truth for all all-great-time, and it can neither be bent nor adjusted to any crazy ideas, delusional constructions, machinations or irrational teachings etc. or be mixed up with them.

The only prominent visitor who contacted us and who obtained all information and all writings without afterwards bartering them away or otherwise falsifying them negatively, is Hermann van Veen. In his songs there is to be recognised an honest and sincere occupation with and careful study of the spiritual teaching and the truth, the laws and recommendations of the Creation, and life. And with his songs and performances he carries a part of the message of the truth into the world at the best of his ability. Of all the many prominent ones who have got in contact with me, he is one of the few of whom one cannot say something negative or reprehensible concerning a misuse of the teaching of the truth, of the life, of the spirit and the Creation and as an honest human being and one who is striving for being human in the real and true sense.

The difference between a well-known and famous personality and the others, the so called normal human beings only lies therein, that it is easier for the prominent ones to go public with there wrong or right opinion, and that it is believed to be true by the broad public quicker and to a greater extent, than it would be and is the case with "ordinary mortals".

I can only give the well-known and famous ones of this world a piece of advice for life which I also offer to all other human beings, namely the tuition about the existence of the Creation and the spirit, and the creational laws and recommendations which lead to the true humanity, and indeed by the way of the truthly truth, the nature, the spiritual teaching, the peace, freedom and love, the wisdom and knowledge and the sense and purpose of life which lead towards the culmination point of all evolution, and that is the fulfilment of life, the completion of all teaching and the oneness with the Creation-spirit.

10th Question:

There are now all kinds of reports about extraterrestrial activities and contacts, e.g., with the "Ashtar-Commando," UMMO, or the "Galactic Union." What do the Plejaren have to say about that?

*N.B. This translation contains errors due to the insurmountable language differences between German and English*

Answer: All reports and statements about supposed contacts by human beings of Earth with extraterrestrials of a so-called "Galactic Union," a group called UMMO, or with the much-cited and supposed "ASHTAR-Commando," are based on swindle, lies, cheating, and schizophrenic delusional constructions, as it is the case with any form of channeling and countless other horror stories of supposed contacts. Out of a million of claims about supposed contacts with extraterrestrials and other-dimensioned ones, etc., only 203 correspond to the truth – in other words, there is approximately 1 real contact per 5000 false claims (status as of 1998).

And one thing is for sure and a decisive sign: everything that is – during any kind of supposed contacts – religiously or even sectarianly founded, is to be recognisable right from the beginning as swindling, lying and deception, insane delusion construction, cheating or schizophrenia. The true love and the teaching of the spirit and of the Creation know of no religion in a cultic sense, but solely and exclusively of the all-embracing and all-universally valid truth of the Creation and the spirit.

Concerning Ashtar Sheran, there is yet to say that this name on Earth is regarded as a pseudonym for the extraterrestrial rowdy and felon ARUSEAK and that this extraterrestrial iniquitously and feloniously was activating on Earth; this is why he and his followers were banished a long time ago through Lyranian/Lyraner, Vegan/Weganer and Plejaren security forces in another dimension, very far and without possibility to return, and also exempt from all their means of travel of technical and spiritual kind, so for him and his comrades neither in spiritual nor in material form a contact with Earth, with human beings of Earth or other life forms in our space-time configuration was possible. Later, Aruseak alias Ashtar Sheran and his followers had tasks which were determined, guided, and controlled by the Plejaren, Lyranians/Lyraner, and Vegans/Weganer, which, however, did not include tasks or contacts on Earth any more. All contradictory claims are only lies, phantasies, delusion constructions, schizophrenia, etc.

When, in 1983, Ashtar Sheran fell back into his old craving for might and tried to gain dominance over Asket's people and attacked them, he and his followers were killed in the DAL Universe.

11th Question:

If you had to summarise the Plejaren message in a few words what would it be?

Answer: Leading back the earthly humankind from the guidance into the unreal and wrong mode of life, wrong philosophies and the turning-away from the creational laws and recommendations and the ausartungen in all fields of badness, shortcomings, irrational religions and deviancies of all kind etc. – brought about through the old Lyranians/Lyraner and Vegans/Weganer, and which were created willingly, joyfully, irresponsibly and consciencelessly through the human being of Earth – towards the right mode of life which is in accordance with the creational laws, recommendations and guidelines.

## An Answer to an Unasked Question

by Billy, Switzerland

What capabilities and prerequisites must one possess for establishing contact with the Plejaren, higher spirit forms, and for the fulfilment of the mission?

The high and heavy task of the mission-fulfilling – which includes as an inherent part the contacts to extraterrestrials and also to high and highest spirit-levels as well as the proclaimerhood, the truth-recognition and truth-spreading, and many other extremely important tasks – demands from the mission-bearer utmost ethical righteousness and greatest moral ripeness. An absolute amount of integrity and loyalty towards the mission, the Creation and its laws and recommendations and towards other human beings is of fundamental importance before all other things. Apart from these two outstanding characteristics, the following is also necessary: absolute trustworthiness, secrecy, sense of responsibility, fulfilment-consciousness and fulfilment-striving as well as firmness of the character; faithfulness to the Creation and to its laws and recommendations; faithfulness to the spiritual guidelines, duties and circumstances as well as to the general evolutionary task,

*N.B. This translation contains errors due to the insurmountable language differences between German and English*

given to the human being by the Creation. This is necessary, as well as the relatively absolute fulfilling – exemplary for the human being – and relatively absolutely fully-developed realisation of all creational laws, recommendations, guidelines, duties and rights into the material human life in every conceivable situation. The fulfilment-willingness and fulfilment-power which are based on the respect for the Creation and the duties and task, given from the Creation to the human being, and on the universally embracing love to all creations of the Creation are the necessary basis for all further characteristics, capabilities and requirements which are imposed on a prophet and proclaimer through the mission. Further to these values, the following is necessary: fighting-courage concerning the mission-fulfilment and achieving the fulfilment of all creational laws and recommendations in the personal field, and also complete undauntedness, unbribableness, steadfastness and patience as well as understanding and lenience, greatest delicacy of feeling, fine-spiritual perceptiveness, deep feelings for others and extensive inner greatness and modesty in all fields and concerns. Without these characteristics, which correspond to actual personal qualities and those based on one's own inner nature, it would be unconceivable in the first place that the task of the mission-fulfilling could be taken into account even in the least. If only one of these aptitudes were missing or not fully developed, then the danger would be too great not to be able to withstand all hostilities whatsoever. To these hostilities not only belong the casting doubts of the personal loyalty and trustworthiness as well as direct and indirect attacks on the life and honour of the mission-bearer, but also the various attempts and possibilities to elicit secret and very high standing knowledge out of the knowledge-bearer, get it out, wheedle it out, coax it out, or extort it from him, even if the human being of Earth is far from being ripe enough for this knowledge for a long time to go, and therefore could foment heaviest damage or could even suggestively and forcefully bring about the absolute destruction of Earth.

This very highly rated level of human and personal advantages and strengths is widened and added through a never ending thirst for knowledge, through scientific compulsion and willingness to learn concerning spiritual and universal-creational laws and recommendations, cognitions, experiences, assessments, and the creation of new knowledge etc. This willingness to learn and the intelligence which is primarily directed towards spiritual and creational questions are endlessly superior to the material-intellectual intelligence – as it is demanded for instance from scientists and researchers in material areas etc. – and the material willingness to learn and material intelligence. They must be evolved so far that therefrom the capability can grow to autonomously acquire the relatively absolute creational and spiritual truth as well as all given universal-creational and spiritual guidelines, laws and recommendations, laws of nature, truths and wisdoms out of one's own accord and own initiative without the slightest outer help from fellow human beings and their knowledge and ability and without any literature. This willingness also includes the autodidactic study of all human misbehaviours, consciousness-based illnesses and all possible consequences of states of delusion, mania, sporadic and chronic consciousness-alterations and consciousness-splittings etc. and their pointing out and relentless and unbribable mentioning, if someone tries to pursue dishonest results therewith. All willingness to learn would be useless without absolute clear-sightedness concerning human beings and their reasons and motives, and also without reality-relatedness and without complete intellectual and consciousness-based self-control.

This self-control has to be thus far characteristic and acquired by hardest self-study, that the own thoughts at any time and in absolute every situation can be – down to the smallest iota – kept under control and shielded, so that not the tiniest negative swinging wave of a thought or feeling is radiated or passed to the surrounding, which requires that a completely neutral and unprejudiced attitude in all situations, towards all circumstances, experiences and life-forms is worked out and becomes – as fundamental attitude – second nature to the human being concerned. This self-control, paired with the mastery of the primary and spirit-telepathy, is the main requirement in order to be suitable as contact-person for contacts with the Plejaren and higher spirit-forms. The Plejaren – who are ahead of the evolution of the human being of Earth in spiritual and consciousness-based form by some 30 million years and therethrough vastly superior to the development of the human being of this Earth – master not only the primary telepathy – which the terrestrial human being of the present time just starts discovering and learning in the first tendencies –, but in the first place and mainly they only make use of the higher spirit-telepathy, the range of which is endless. But because of this and through their evolutive superiority and comprehensive spiritual education and faithfulness to the creational laws, the swinging waves of the Plejaren are intensive and highly frequented to such an extent that they absolutely cannot get in touch with the normally developed human beings who are in conformity with the terrestrial evolution-standard. On one hand, the Plejaren would aggressively be attacked by the still coarse swinging waves of the human being of Earth, – which could cause unforeseeable consequences for life and limb –, and on the other hand they themselves would have an effect on the human being of Earth like an irresistible magnet, through which they would fall in absolute dependence and bondage for them. This dependence, resulting from a sudden incompatibility towards

*N.B. This translation contains errors due to the insurmountable language differences between German and English*

normal swinging waves of human beings of Earth, would trigger a one-sided compulsion to fulfil the laws and recommendations of the Creation, far beyond the extent bearable for the human being of Earth. Unschooling human beings of Earth would have nothing to set against this compulsion for creational harmony, because they do not or only partly and inadequately possess or have developed those characteristics – which are absolutely necessary for the mission-bearer –, as a result of which they would unresistingly fall for the high-frequented harmony and equalisedness of the Plejaren and the swinging wave of love of high and highest spiritual levels and would make the normal life, as it is given on our Earth, a complete stranger to themselves and thus would make themselves incapable of life as well. These facts demand stringently a special and extremely hard and un-lenient schooling for that human being of our Earth whose spirit-form has – due to tens of thousands of years long experience and proof in earlier lives and in equally directed missions – been chosen by the Plejaren and counsellors even standing higher to them to act as contact-person and therefore to take over, bear and fulfil the mission of the truth-bringing and truth-spreading. Solely this human being, whose spirit-form by the name of Nokodemjon has come back into the material world out of the levels of "Arahat Athersata", has the right to resume this, his entirely own duty, to fulfil it and to call himself a prophet in the full extent and in the deepest sense of the word, concerning all other human beings in similar task and missions.
