

# **Cosmic Rhythms Connection To Farming Activities**

Free Subsidy Available  
to Organic Farmers

# Important To Remember

- These are only broad principles
- Current conditions/practical constraints will always need to override
- Our farms are living/breathing organisms with their own identities/personalities
  - Hence, important for the farmer to understand her farm intimately, experiment and find what works best.
  - Farmers need to be researchers & the farm their laboratory
- Plants grown with chemicals & poisons are rendered insensitive to their surroundings & do not respond to Cosmic Rhythms
  - Hence planting calendar in chemical farming may see no benefit other than as an organizing aid
