

School Name  
School Address

Date

County Soil Conservation District  
SCD address

To whom it may concern,

The school and team name is requesting the support of the County Soil Conservation District to compete in this year's Lewis and Clark Regional Envirothon Competition October 8, 2025 at the North Dakota Game and Fish Building in Bismarck. *The registration fee for the competition is \$25 per team. We'd greatly appreciate your financial support. Please contact the ND Envirothon Coordinator ([ndenvirothon@gmail.com](mailto:ndenvirothon@gmail.com)) to coordinate this payment (up to the team if they want to request this).*

The Envirothon is a unique opportunity for high school students in North Dakota. Through the program students learn about soils, rangelands, forestry, aquatics, and wildlife. In addition they learn about a current major issue that affects our land and water every day. This year's current issue is "Nonpoint Source Pollution, It Begins At Home." Each team consists of five members who must work together to identify plants, animals, soil types, construct food webs, and perform various aquatic tests. The program promotes teamwork, friendship, study skills, appreciation & stewardship of natural resources, and just plain fun.

The partnership between schools, local soil conservation districts and the ND Envirothon is vital to strengthening the program and increasing students' understanding of natural resources. Please visit the ND Envirothon website <http://www.ndenvirothon.org/> for more information about our program.

Sincerely,

*Team signatures*

The \_\_\_\_\_ Soil Conservation District is excited to support the school and team name in this year's ND Envirothon Regional Competitions.
