Re: GTR Synthetic Grass Specialists

I am writing this letter of reference in support of GTR's tender for turf replacement at McGill University.

As Manager of Operations and Infrastructure for Vikes Athletics and Recreation at the University of Victoria, I was the departmental lead for our recent project in the summer of 2012 to resurface our 14,550 m² artificial turf Field 2. This project included removal and disposal of the existing turf, preparation of the sub-base gravel assembly, manufacture, supply, installation and warranting of a new artificial turf system.

GTR was awarded the contract based on their comprehensive proposal and competitive bid. Throughout the project they were approachable, accountable and thorough in ensuring that they delivered the product that was promised in the bid process.

GTR staff were extremely professional, and during the construction phase always left the site in secure and good condition. It was apparent that they took pride in their work.

In addition to supplying us with a quality turf install, GTR recognizes the importance of turf maintenance and is working with our Grounds department to establish a maintenance program that will ensure the longevity of our new field.

We are would be pleased to consider future projects with GTR as we plan for a cycle of ongoing field renewal with the other two artificial turf fields on campus.

Please do not hesitate to contact me if you have specific questions.

Sincerely,

Michelle Peterson
Manager, Operations and Infrastructure
