Our safety program is tailored to meet the site specific client needs to achieve an “zero incident” project.

Proven Performance

Take advantage of our vast experience to plan a safe, on schedule and within budget project. Cust-O-Fab Specialty Services is an industrial leader in providing a management Team with expertise in power generation equipment and skilled craftsmen. Our clients receive the advantage of safe, well planned and efficient project every time.

Specialty Service – Retrofit Power

Take advantage of Cust-O-Fab Specialty Services with experienced craftsmen and supervision that provides a comprehensive retrofit solution in the power generation business.

Our team has earned a reputation throughout the power generation industry for completing projects and shutdowns safely, on time and within budget.

Cust-O-Fab Clients

General Electric • Exelon Power • Tennessee Valley Authority (TVA) • NAES - Oklahoma City Cogeneration
OG&E • Dow Chemical • Air Liquide • Air Products • Huntsman Chemical

Our Services

Cust-O-Fab Specialty Services offers our clients a single source of contact for construction, as well as fabrication, to meet customer requirements and schedule.

Cust-O-Fab Specialty Services can provide the latest technology in exhaust plenums, exhaust ductwork and exhaust interior liner upgrades that will drastically reduce external heat transfer, making the unit safer and more efficient and easier to operate and maintain. A typical retrofit exhaust plenum assembly can be installed in one to two weeks during a scheduled maintenance outage, with the diffuser and turbine shaft in place.

We provide the following cost-effective retrofit solutions for your power generation project:

- » Exhaust Plenum Upgrades – Improved Design
- » Exhaust Interior Liner Upgrades & Repairs
- » Exhaust Ductwork & Silencers
- » Inlet Filterhouse & Cooling Systems
- » Inlet Ductwork & Silencers
- » Inlet Bleed Heat Ducts & Piping
- » ASME Code Welding
- » Speciality Welding Services
- » Boiler Upgrades & Repair

Our commitment is to partner with you for success. We develop long term client relationships built on trust and with our commitment to Safety, Quality, Schedule & Value.

Quality Performance

Cust-O-Fab Specialty Services is committed to our customers to build quality into every project. Our quality program sets the standard and criteria to assure that our work meets or exceeds applicable codes and project requirements. Providing qualified QA/QC that are actively involved in the monitoring, enforcement and on going evaluation of project quality. On every project we deliver a detailed QC documentation package of all inspections. Successful performance can only be accomplished with trained employees that are dedicated and committed to safety and quality.
