New Listings	1,070	1,116	-4.1%
Pending Inventory	72	84	-14.3%
Inventory (Active Listings)	199	169	17.8%
Months Supply of Inventory	2.7	2.1	28.6%

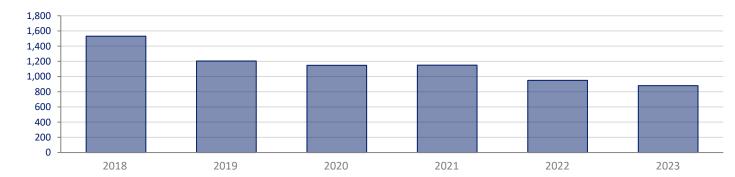

## **Closed Sales**

The number of sales transactions which closed during the year

*Economists' note*: Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend comparing the percent changes in sales rather than the number of sales.

Year	Closed Sales	Percent Change Year-over-Year
2023	881	-7.3%
2022	950	-17.3%
2021	1,149	0.1%
2020	1,148	-4.7%
2019	1,205	-21.2%
2018	1,530	9.7%

### Single-Family Homes

#### Navarre Area Board of REALTORS®

this statistic should be interpreted with care.

Percent Change Cash Sales Year Year-over-Year 2023 137 -23.9% The number of Closed Sales during the year in which buyers exclusively paid in cash 2022 180 8.4% 2021 166 45.6% **Economists' note**: Cash Sales can be a useful indicator of the extent to 2020 114 5.6% which investors are participating in the market. Why? Investors are far more likely to have the funds to purchase a home available up front, 2019 108 -30.3% whereas the typical homebuyer requires a mortgage or some other

### Single-Family Homes

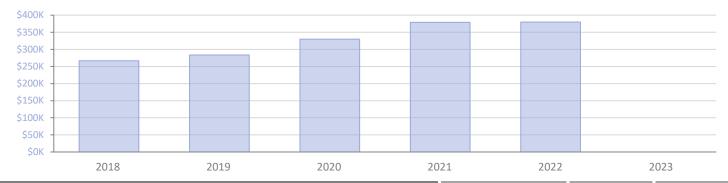

#### Navarre Area Board of REALTORS®

The median sale price reported for the year (i.e. 50% of sales were above and 50% of sales were below)

**Economists' note**: Median Sale Price is our preferred summary statistic for price activity because, unlike Average Sale Price, Median Sale Price is not sensitive to high sale prices for small numbers of homes that may not be characteristic of the market area. Keep in mind that median price trends over time are not always solely caused by changes in the general value of local real estate. Median sale price only reflects the values of the homes that *sold* each year, and the mix of the types of homes that sell can change over time.

Year	Median Sale Price	Percent Change Year-over-Year
2023	\$380,068	0.3%
2022	\$379,000	14.8%
2021	\$330,000	16.4%
2020	\$283,438	6.4%
2019	\$266,483	7.0%
2018	\$249,050	7.1%

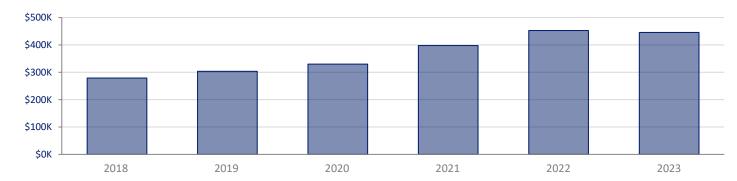

# Average Sale Price

The average sale price reported for the year (i.e. total sales in dollars divided by the number of sales)

*Economists' note*: Usually, we prefer Median Sale Price over Average Sale Price as a summary statistic for home prices. However, Average Sale Price does have its uses—particularly when it is analyzed alongside the Median Sale Price. For one, the relative difference between the two statistics can provide some insight into the market for higher-end homes in an area.

Year	Average Sale Price	Percent Change Year-over-Year
2023	\$445,882	-1.5%
2022	\$452,472	13.7%
2021	\$397,804	20.6%
2020	\$329,876	8.7%
2019	\$303,466	8.7%
2018	\$279,068	9.0%

### Single-Family Homes

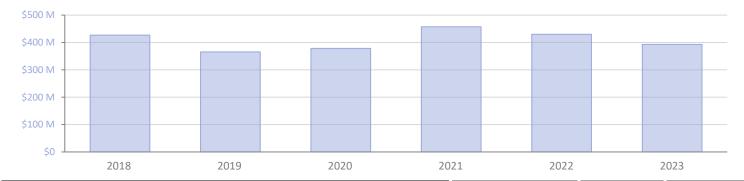

#### Navarre Area Board of REALTORS®

The sum of the sale prices for all sales	s which closed
during the year	

Economists' note: Dollar Volume is simply the sum of all sale prices in a given time period, and can quickly be calculated by multiplying Closed Sales by Average Sale Price. It is a strong indicator of the health of the real estate industry in a market, and is of particular interest to real estate professionals, investors, analysts, and government agencies. Potential home sellers and home buyers, on the other hand, will likely be better served by paying attention to trends in the two components of Dollar Volume (i.e. sales and prices) individually.

Year	Dollar Volume	Percent Change Year-over-Year
2023	\$392.8 Million	-8.6%
2022	\$429.8 Million	-6.0%
2021	\$457.1 Million	20.7%
2020	\$378.7 Million	3.6%
2019	\$365.7 Million	-14.4%
2018	\$427.0 Million	19.6%

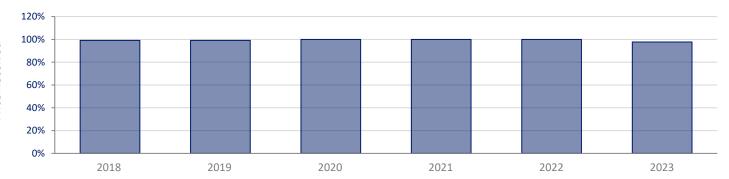

## Median Percent of Original List Price Received

The median of the sale price (as a percentage of the original list price) across all properties selling during the year

*Economists' note*: The Median Percent of Original List Price Received is useful as an indicator of market recovery, since it typically rises as buyers realize that the market may be moving away from them and they need to match the selling price (or better it) in order to get a contract on the house. This is usually the last measure to indicate a market has shifted from down to up, so it is what we would call a *lagging* indicator.

Year	Med. Pct. of Orig. List Price Received	Percent Change Year-over-Year
2023	97.7%	-2.3%
2022	100.0%	0.0%
2021	100.0%	0.0%
2020	100.0%	0.9%
2019	99.1%	0.0%
2018	99.1%	-0.1%

### Single-Family Homes

#### Navarre Area Board of REALTORS®

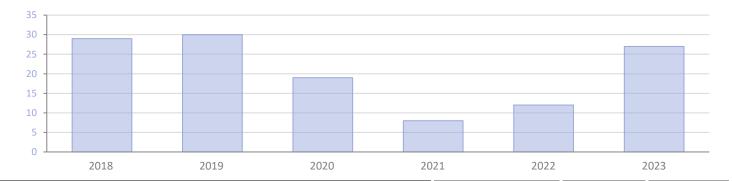

## Median Time to Contract

The median number of days between the listing date and contract date for all Closed Sales during the year

**Economists' note**: Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the year. The difference is that Time to Contract measures the number of days between the initial listing of a property and the signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.

Year	Median Time to Contract	Percent Change Year-over-Year
2023	27 Days	125.0%
2022	12 Days	50.0%
2021	8 Days	-57.9%
2020	19 Days	-36.7%
2019	30 Days	3.4%
2018	29 Days	-12.1%

Median Time to

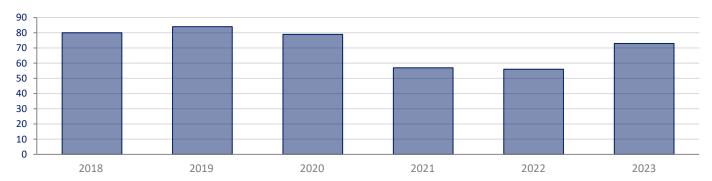

## Median Time to Sale

The median number of days between the listing date and closing date for all Closed Sales during the year

*Economists' note*: Time to Sale is a measure of the length of the home selling process, calculated as the number of days between the initial listing of a property and the closing of the sale. *Median* Time to Sale is the amount of time the "middle" property selling this month was on the market. That is, 50% of homes selling this month took *less* time to sell, and 50% of homes took *more* time to sell. Median Time to Sale gives a more accurate picture than Average Time to Sale, which can be skewed upward by small numbers of properties taking an abnormally long time to sell.

Year	Median Time to Sale	Year-over-Year
2023	73 Days	30.4%
2022	56 Days	-1.8%
2021	57 Days	-27.8%
2020	79 Days	-6.0%
2019	84 Days	5.0%
2018	80 Days	-13.0%

edian Time to Sale

### Single-Family Homes

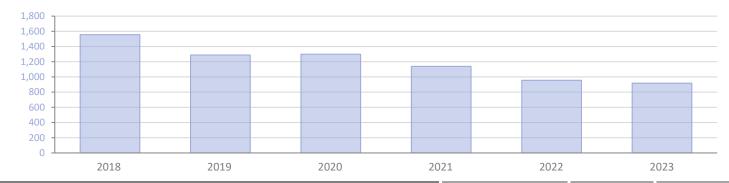

#### Navarre Area Board of REALTORS®

The number of listed properties that went under contract during the year

**Economists' note**: Because of the typical length of time it takes for a sale to close, economists consider Pending Sales to be a decent indicator of potential future Closed Sales. It is important to bear in mind, however, that not all Pending Sales will be closed successfully. So, the effectiveness of Pending Sales as a future indicator of Closed Sales is susceptible to changes in market conditions such as the availability of financing for homebuyers and the inventory of distressed properties for sale.

Year	New Pending Sales	Percent Change Year-over-Year
2023	919	-3.9%
2022	956	-16.1%
2021	1,139	-12.4%
2020	1,300	0.9%
2019	1,288	-17.2%
2018	1,555	2.3%

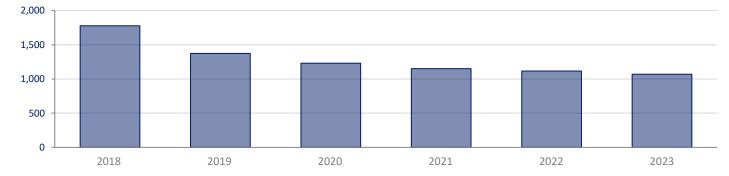

# **New Listings**

The number of properties put onto the market during the year

**Economists' note**: New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really *new* listings.

Year	New Listings	Year-over-Year
2023	1,070	-4.1%
2022	1,116	-3.0%
2021	1,150	-6.5%
2020	1,230	-10.5%
2019	1,374	-22.8%
2018	1,779	7.3%

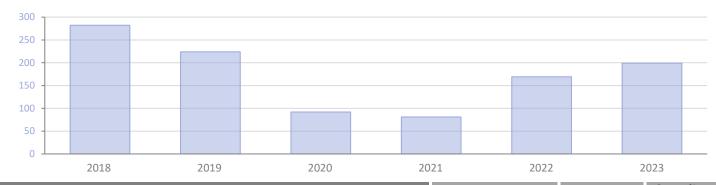

#### Navarre Area Board of REALTORS®

The number of property listings active at the end of the year

**Economists' note**: There are a number of ways to define and calculate Inventory. Our method is to simply count the number of active listings on the last day of the year, since it is the most current. Inventory rises when New Listings are outpacing the number of listings that go offmarket (regardless of whether they actually sell). Likewise, it falls when New Listings aren't keeping up with the rate at which homes are going off-market.

Year	Inventory	Percent Change Year-over-Year
2023	199	17.8%
2022	169	108.6%
2021	81	-12.0%
2020	92	-58.9%
2019	224	-20.6%
2018	282	-14.3%

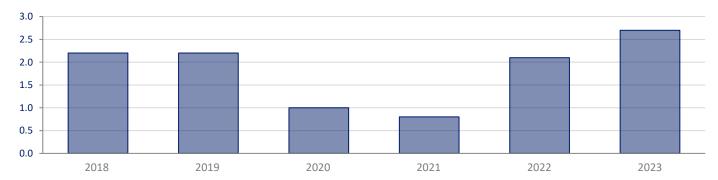

# Months Supply of Inventory (Year-End)

An estimate of the number of months it will take to deplete the current Inventory given recent sales rates

*Economists' note*: MSI is a useful indicator of market conditions. The benchmark for a balanced market (favoring neither buyer nor seller) is 5.5 months of inventory. Anything higher is traditionally a buyers' market, and anything lower is a sellers' market. There is no single accepted way of calculating MSI. A common method is to divide current Inventory by the most recent month's Closed Sales count, but this count is a usually poor predictor of future Closed Sales due to seasonal cycles. To eliminate seasonal effects, we use the 12-month average of monthly Closed Sales instead.

Year	Months Supply	Percent Change Year-over-Year
2023	2.7	28.6%
2022	2.1	162.5%
2021	0.8	-20.0%
2020	1.0	-54.5%
2019	2.2	0.0%
2018	2.2	-21.4%

#### Navarre Area Board of REALTORS®

## Closed Sales by Sale Price

The number of sales transactions which closed during the year

**Economists' note**: Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend comparing the percent changes in sales rather than the number of sales.

Sale Price	Closed Sales	Percent Change Year-over-Year
Less than \$50,000	3	0.0%
\$50,000 - \$99,999	5	0.0%
\$100,000 - \$149,999	5	-54.5%
\$150,000 - \$199,999	15	-40.0%
\$200,000 - \$249,999	51	4.1%
\$250,000 - \$299,999	100	3.1%
\$300,000 - \$399,999	316	-6.0%
\$400,000 - \$599,999	265	-14.0%
\$600,000 - \$999,999	92	19.5%
\$1,000,000 or more	29	-25.6%

## Median Time to Contract by Sale Price

The median number of days between the listing date and contract date for all Closed Sales during the year

*Economists' note*: Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the year. The difference is that Time to Contract measures the number of days between the initial listing of a property and the signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.

Sale Price	Median Time to Contract	Percent Change Year-over-Year
Less than \$50,000	56 Days	194.7%
\$50,000 - \$99,999	14 Days	-6.7%
\$100,000 - \$149,999	124 Days	1027.3%
\$150,000 - \$199,999	21 Days	0.0%
\$200,000 - \$249,999	23 Days	155.6%
\$250,000 - \$299,999	23 Days	228.6%
\$300,000 - \$399,999	23 Days	109.1%
\$400,000 - \$599,999	29 Days	141.7%
\$600,000 - \$999,999	29 Days	31.8%
\$1,000,000 or more	99 Days	182.9%

## New Listings by Initial Listing Price

The number of properties put onto the market during the year

**Economists' note:** New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really *new* listings.

Initial Listing Price	New Listings	Percent Change Year-over-Year
Less than \$50,000	2	-33.3%
\$50,000 - \$99,999	5	-37.5%
\$100,000 - \$149,999	5	-64.3%
\$150,000 - \$199,999	15	-34.8%
\$200,000 - \$249,999	55	12.2%
\$250,000 - \$299,999	92	-22.7%
\$300,000 - \$399,999	380	8.0%
\$400,000 - \$599,999	333	-6.5%
\$600,000 - \$999,999	122	0.0%
\$1,000,000 or more	61	-12.9%

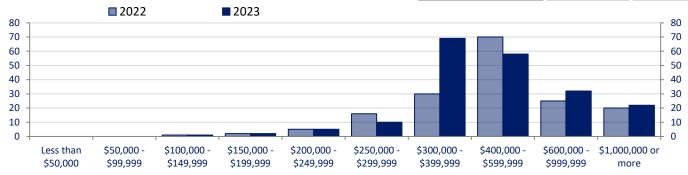

# **Inventory by Current Listing Price**

The number of property listings active at the end of the year

**Economists' note**: There are a number of ways to define and calculate Inventory. Our method is to simply count the number of active listings on the last day of the year, since it is the most current. Inventory rises when New Listings are outpacing the number of listings that go offmarket (regardless of whether they actually sell). Likewise, it falls when New Listings aren't keeping up with the rate at which homes are going off-market.

Current Listing Price	Inventory	Percent Change Year-over-Year
Less than \$50,000	0	N/A
\$50,000 - \$99,999	0	N/A
\$100,000 - \$149,999	1	0.0%
\$150,000 - \$199,999	2	0.0%
\$200,000 - \$249,999	5	0.0%
\$250,000 - \$299,999	10	-37.5%
\$300,000 - \$399,999	69	130.0%
\$400,000 - \$599,999	58	-17.1%
\$600,000 - \$999,999	32	28.0%
