# **Reemployment Services & Eligibility Assessments (RESEA):**

## **Impact in Nevada & Other States**

# Nevada RESEA – Randomized Controlled Trial (2009-2011) Found Sizable Impacts:

---

- 18% (\$2,988) increase in earnings/claimant over ~2y
- 4% point increase in employment rate at 1.5y (52% treatment vs 48% control)
- \$999 (9%) decrease in total UI benefits/claimant over ~2y (program cost was \$234/claimant)

# Nevada RESEA – Replication Trial (2014-2020) Found Sizable Impacts:

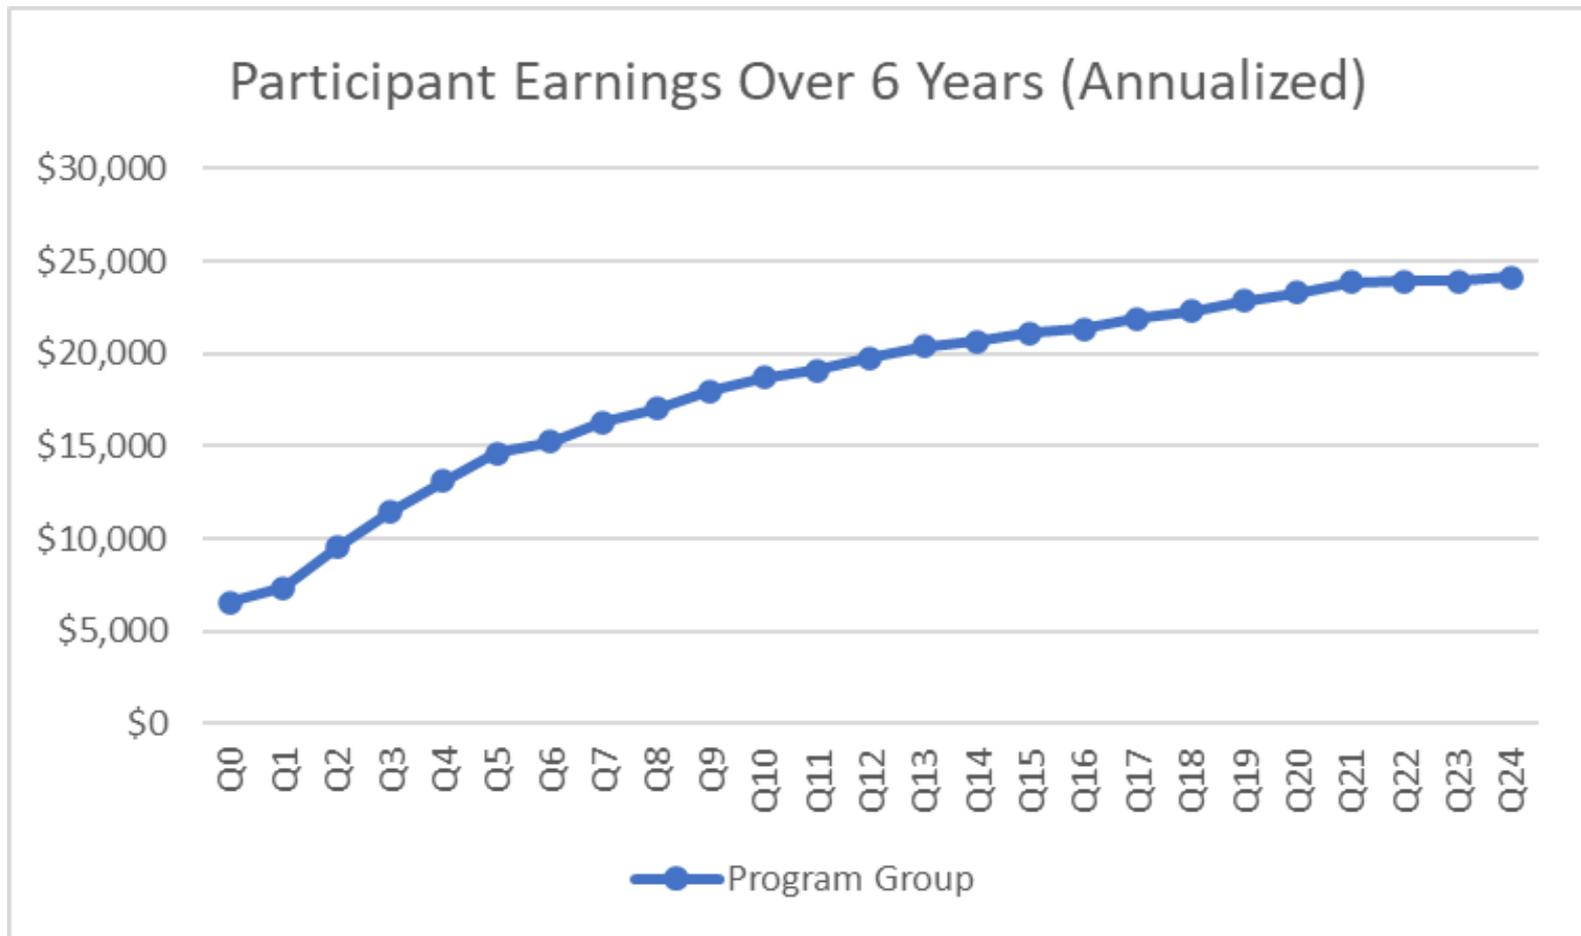

---

- 13% (\$13,324) increase in total earnings/claimant over 5y
  - The yearly earnings impacts were \$2,800 in years 1-4, and \$2,000 in year 5.
- \$457 (9%) decrease in UI benefits/claimant over 1y (program cost was \$290/claimant)

# Randomized Trial of RESEA in IN, NY, WA, WI (2015-2017) Found Much Smaller Impacts:

- 2% (\$465) increase in earnings/claimant in year 1, fading to ~0% in year 2
- 1.4% point increase in employment rate in year 1, fading to 0.4% point in year 2
- \$347 (8%) decrease in UI benefits/claimant over ~1y
- Impacts were small in each of the 4 states analyzed separately
