

**UC Berkeley SkyDeck**

2150 Shattuck Avenue, Suite 800 Berkeley, CA 94704 United States

**August 8<sup>th</sup>, 2025**

Dear Berkeley SkyDeck Leadership,

UC Berkeley's pioneering research in privacy-preserving AI systems has inspired Destiny-Gram's constitutional memory platform - demonstrating that user data sovereignty enhances rather than compromises AI performance.

**Research Innovation:** Constitutional memory represents breakthrough in privacy-preserving AI personalization. Independent Claude AI assessment confirms this addresses fundamental challenges in ethical AI systems while delivering measurable performance improvements.

**Berkeley Partnership Value:**

- BAIR institute collaboration in privacy-preserving AI research
- Academic validation for constitutional memory architecture
- Publication opportunities in top-tier computer science venues
- Berkeley leadership in defining ethical AI personalization standards

**Technical Achievement:** 900+ pages enterprise-grade code with comprehensive privacy implementation. Production-ready platform demonstrating privacy-performance optimization at scale.

**Market Impact:** Enterprise customers increasingly require privacy-compliant AI solutions. Constitutional memory transforms regulatory compliance from constraint into competitive advantage.

**Silicon Valley Ecosystem:** Y-Combinator application decision pending September 5th. Anthropic partnership discussions active. Stanford StartX, MIT Engine partnerships developing. Berkeley collaboration would strengthen comprehensive innovation ecosystem positioning.

**Global Implications:** Constitutional Memory Manifesto published in 5 languages. International demand for privacy-preserving AI alternatives growing rapidly. Berkeley research partnership positions ethical AI personalization as global standard.

Research collaboration discussion available? Strategic timing aligned with Y-C deadline creates partnership opportunity.

Respectfully,

Greg Malpass Founder, Destiny-Gram [malpass.greg@gmail.com](mailto:malpass.greg@gmail.com)
