

Rubber Speed Bumps

Rubber Speed Bumps are made from recycled rubber with reflective tape and cat's eye reflectors for added visibility even on dark nights. Speed Bumps have a channeled bottom to cover cables. Installation is easy with rebar spikes for asphalt surfaces or lag bolts and shields for concrete surfaces. End Caps add a finished look.

Rubber Speed Bumps calm traffic in high-volume mall parking lots, condominium complexes, residential roads and alley lanes.

Recycled rubber speed bumps greatly outlast concrete or asphalt competitors.

- Maintenance-free
- Resistant to weather, salts, and chemicals
- Environmentally friendly
- Temporary or permanent applications
- Used for commercial and residential roadways

Recommended for high pedestrian areas:

- Shopping centers
- School zones
- Parking lots and garages
- Gated communities
- Hotel entrances
- Drive-thrus
