# KPMI® VALVE STEM SEALS

**USED BY THE TOP RACERS  
IN THE WORLD**

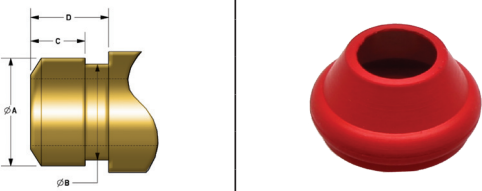

**INSIST ON THE RED ONES!**

KPMI® has been working for the past ten years designing and developing a premium line of “RED” valve stem seals. The KPMI® engineering team were given strict guidelines to develop seals that are made from premium materials, provide optimum fitment, offer maximum life and allow for maximum lift. By limiting material choices to High Temperature Viton® and Teflon®, the entire KPMI® Red Seal line are resistant to high temperatures, petroleum products and corrosive gasses that typically break down lesser quality seals. KPMI® seals retain their ability to seal in situations that other materials harden and deform, which then allows oil to bypass the seal and enter into the combustion chamber, causing detonation, carbon build up and a loss of power. Don't complete you're next rebuild without a set of the “Red Ones”.

<p><b>KPMI® Seal Style 1</b></p>			<p><b>KPMI® Seal Style 3</b></p>		
<p><b>KPMI® Seal Style 2</b></p>			<p><b>KPMI® Seal Style 5</b></p>		
<p><b>KPMI® Seal Style 4</b></p>			<p><b>KPMI® Seal Style 7</b></p>		
<p><b>KPMI® Seal Style 6</b></p>			<p><b>KPMI® Seal Designs Offer a Diagram and Dimentions So You Can Insure For a Proper Fit.</b></p>		

All KPMI® seals are conveniently packaged in quantities of: 4, 8, 16, 50, and 100. Value added savings have been built into the 16, 50, and 100 quantity packs with 10, 15, and 20% savings respectively. All 5-valve motors have been kitted and when a model has unique stem diameters between intake and exhaust, they too have been kitted. In the following pages of this brochure you can find the comprehensive offering of valve stem seals KPMI® has to offer.

## Seal Style 1 - Solid Viton

Stem Diameter	O.L.	Seal O.D.	Designed for these guide specs				OEM REF.

**Seal Installation Detail**

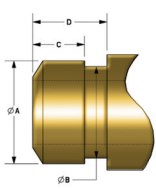

**Seal Installation Tool P/N 20-20835**

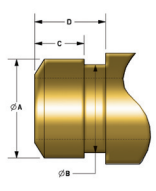

The Installation tools for OE style seals are manufactured from high strength 6061-T6 Aluminum for increased durability when compared to plastic installers. The tools are designed for precision fitment onto the seal OD to help the builder center the seal over the valve guide so that a few light strikes from a hammer will set the seal. Radiused top striking surface reduces the likelihood of a burr forming from deformation.

Each installation tool is color coded and laser marked for each seal size by guide diameter. For more information visit [KPML.US](http://KPML.US)

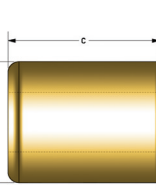

### BSA® B25™ 1968-1971 (2-Valve) Seal Kit
