

VISUAL PRODUCT COMPARISON

The images and information below outline the differences between our Flat Backer Grille and Doweled Grille

FLAT BACKER GRILLE

- Attach to heavy-duty 15/16" grid using standard fasteners.
- Standard backers are 1/2" thick and 1 3/4" or 1 3/8" wide, spaced 12" on center.
- Backers are made from superior grade void-free Baltic Birch plywood, and are typically stained black.
- Typically lower cost assembly compared to doweled grille.

DOWELED GRILLE

- Attach to heavy-duty 15/16" grid using our steel dowel lock clip.
- Standard dowels are 9/16" in diameter, spaced 12" on center.
- Dowels are made from solid hardwood and are typically stained black.
- Each board is drilled for dowel location using precision CNC equipment.
