

We have a **NEW** family member!

Pop-Link® Mounting Systems by ADandD.com is pleased to introduce our newest family member...

THE JRPL SERIES

[Click here to see the series on our website.](#)

The JRPL Series rounds out our product family, offering a light duty and space saving alternative to **The PL Series** and **The HDPL Series**, while maintaining the same quality and versatility. **The JRPL Series** is made from 6061 anodized aluminum and assembled using Stainless Steel fasteners. The series was designed to hold light weight sensors in tight spaces and is compatible with the **Sensor Brackets** (P/N starting with PL-SBxx) found in

The Bracket Series.

The Bases

The Knuckles

WHICH SERIES IS RIGHT FOR YOU

Below are approximate holding weights 6" from centerline of ball.

- The HDPL Series: 160 lbs.
- The PL Series: 70 lbs.
- The JRPL Series: 5 lbs.

Please contact us with any questions... we look forward to hearing from you!
