About Interstate

Interstate Wood & Vinyl Products manufactures our *Visions* vinyl fence line in Amityville, NY. Our products are distributed to a selected group of preferred fence contractors and distributors throughout the North East. Our goal is to deliver quality products which are designed to perform and meet your expectations for security and beauty now and into the future. Before you make a decision on the vinyl fence products you will be investing in for your home or business, ask your fence contractor to show you our product samples and see for yourself the Interstate difference.

The Interstate Difference

Diverse Product Line: Available in an extensive line of styles, heights and five different colors; white, tan, adobe, grey and cedar grain vinyl, our Visions fence line offers infinite combinations. Suitable for a wide range of vinyl fence, railing, and pool safety applications, Interstate can recommend the right fence for each and every project.

Customization: Our complete line of vinyl fence, railings, arbors & gates can all be customized. When an off the shelf product simply will not do, we offer a build to order customized solution to meet the most challenging set of on site conditions.

Engineered Products: Our vinyl fence products are manufactured using the highest grade raw materials formulated to withstand the harsh conditions found in the North-East. Our products are engineered with more ribs, of a heavier gauge vinyl and are re-enforced with steel stiffeners.

Product Warranty: Our products are backed by our non-transferable warranty and we stand alongside our network of fence contractors & distributors to ensure our products meet your needs now and into the future.

What Makes Our Vinyl Fence Better

Mid-Rail: All privacy styles with a topper are manufactured with a 2" x 6" double-ribbed mid-rail. This mid-rail with its ridge design is a key component for Interstate's interlocking fence sections.

Interlocking Panels: Our fence sections use an interlocking construction which locks the vertical boards into the bottom and mid-rail. Our patented 2" x 6" rails have a ridge feature that allows this interlocking system to reduce sections from knock-out and wind blowouts.

Bottom Rail: The foundation of all of our PVC sections is our patented 2" x 6" heavy duty bottom rail with an internal steel support. This rail also features a ridge design for interlocking ability. The increased structural strength of this rail reduces sagging, premature failure, and damage from wind.

Gate Frame: Vinyl gates have always been an area of product failure within the vinyl fence industry. All of our gates are manufactured using our patented 3 1/2" x 3 1/2" gate master frame. Its double walled feature enables hardware screws to penetrate two layers of the frame, making for stronger connections and reducing screws from pulling out. This gate master design is structurally stronger than that of our competition's hollow or narrow gate frames. Bottom Line: Our gates last longer!

Gate Stop: This positive stop, patented by Interstate, is an additional piece of gate hardware that you will only find in our system. This stop is an insurance policy for all gates as it absorbs the violent act of the gate slamming and many times protects against the resulting stress fractures and gate failure. Our gate stop is included with every walk and drive gate.

Interstate Featured Product:

Cedar Grain Vinyl Fence

Our Cedar Grain Vinyl Fence is unlike any other composite fence on the market today! We offer an extensive line of Cedar Grain fence styles & gates to satisfy your rear, front yard as well as pool enclosure fence needs. We have developed this product to look like natural wood, with the low maintenance advantages of vinyl. Through advancements in vinyl and acrylic materials, our

Cedar Grain Vinyl Fence line will last and outperform that of wood & other similar vinyl fence products well into the future. See for yourself how our product will outperform other composite and painted products on the market.
