**TUKYSA<sup>™</sup> (TUCATINIB): A New Treatment Option  
For Patients with HER2 Metastatic Breast Cancer (MBC)**

presented by

**Alison Conlin, MD**

(Providence Cancer Institute)

7:00 am, Saturday, September 12, 2020, Virtual

Dr. Alison Conlin is a physician and researcher at the Providence Cancer Institute in Portland, Oregon. She is a medical oncologist who leads the breast cancer program in medical oncology for the institute. She specializes in the treatment of breast cancer and other high risk breast conditions and completed her fellowship training at Memorial Sloan-Kettering Cancer Center in 2008. She also has a Master's degree in Public Health Degree from Boston University where she focused on health services research. Dr. Conlin has an interest in clinical trials and getting those to patients for all stages of breast cancer. Specifically she has written clinical trials for patients with advanced breast cancer and with brain metastases from breast cancer. Additionally she worked with the American Cancer Society focusing on cancer screening, prevention and follow-up care in the Oregon Health Study. She is passionate about the care of patients and getting the best resources to them. She lives in Portland with her 3 children and husband.
