

2030 Bare Bones Wet dry unit Package

Packaged as a basic sump for use on pre-drilled aquariums that contain a built-in weir (overflow)

Aqua-Link 2000 series filters are manufactured with ¼” thick, high grade cell-cast acrylic. These durable hand crafted units are “Smart Chassis Design” that provide exceptional biological, and mechanical functionality; they are extremely versatile allowing you to tailor units by adding additional accessories to meet your specific needs and enhance life support for any freshwater or marine aquaria.

Your purchase inquiry is for a new Aqua-Link 2030 Dual Chamber, Wet/Dry sump unit designed and rated to provide biological life support for standard size aquariums up to 200 gallons. This package provides the main core unit only.

Dimensions: 30” x 10” x 16” (plumbing fittings and lid removal require an additional 3” inside height). Provides a hefty; 20.8 gallons sump capacity to reduce evaporation maintenance.

Your purchase will include only the items shown in the main photo of this variation.

(NOTE) Due to multiple styles and set-up applications, it is not practical to include a “One Size Fits All” water pump. Therefore a water pump, return line plumbing, air pumps, and water heaters are not included with this package but can be purchased separately. Please browse the supplemental photos that demonstrate various attachments and/or possible applications.

This Package Includes :

- (1) Core “Smart Chassis” Dual Chamber Filter/Sump unit. (Nitro chambers hold 10.4 gallons of primary bio media) with built-in submersible heater chamber and air injection tubes.
- (4) Styrene egg crate bio-media support trays.
- (2) Chamber Lids with 1”, 90 degree PVC bulk head drain fittings.
- (2) Split design chamber drip trays is supplied by default. (a spray bar assembly, in lieu of drip plate may be requested at time of purchase)
- (1) Sump lid; removable and hinged to provide easy access to sump pump and added peripherals.
