Woven Cane & Spline Reed

	<u>UC-125</u> 24" Wide 1/2" Mesh Woven Cane (Ft) \$ 16.00 Ft 10 @ \$ 14.50
---	--

Used with furniture that has a groove for cane which is held in place with a piece of spline reed. Can also be used for decoration on furniture or cabinets with a molding covering the edges. The cane is soaked in water for approximately 8 hours before applying to furniture, allowing the cane to become flexible while being worked and tight when dry.

	<u>UC-225</u> Spline Reed (Medium Size #8-1/2) (Ft) \$ 0.30 Ft 50 @ \$ 0.30
--	---

After the woven cane has been tapped down into the groove, a bead of white glue is put into the groove and the spline reed is wedged down into the cane. Excess cane is cut off after the woven cane is dry.
