The Contactee

'**Billy**' **Eduard Albert Meier** was born on February 3rd 1937 in Bülach, Switzerland. He was the second of seven children and his father was a shoemaker. From the age of 5, he began a series of contacts with the extraterrestrial visitors who claim to have come from the Pleiades Star Cluster. During the contacts, he was conveyed important information regarding the state of our planet and was also taught by them in various fields to prepare him for his eventual mission as a teacher and proclaimer of the truth. During his youth, he travelled through many countries and learned the trades of many different types of jobs and was eventually given the nickname 'Billy' since his cowboy style attire at that time resembled that of 'Billy the Kid'. During his later years until now (2020), he resides in the Semjase-Silver-Star-Center, Hinterschmidrüti, Switzerland, where he has written many books detailing the information conveyed to him as well as many other topics regarding the true nature of our existence and world.

The Visitors

According to Billy, the extraterrestrials look just like us with the exception of a slightly longer ear lobe. They prohibit themselves from being seen publicly by human beings for their own security and by the same reason, also do not allow pictures of themselves to be taken, with the exception of their spaceships for the purpose of providing evidence of their visit. Their primary reason for their visits is to provide urgent information that will help us to prevent major catastrophic events that would occur should we fail to heed the messages.

Wars and Nuclear Threat

The Urgent Message

The Message: Our world has come to a critical point of development where we have either the means to completely destroy our own home planet or become more rational and peaceful so that we can continue to develop to become a harmonic, peaceful and loving civilisation capable of space travel ourselves.

The main issues we face today are: Overpopulation and the resulting pollution, unnatural climate change, destruction of the environment, exploitation and dwindling of natural resources and in-turn, the fight for resources, escalating into wars, etc. Combined with our unbridled materialism, the one-sided technological development and greed for might, we have missed the true sense of life and are on a dangerous trajectory towards our own destruction.

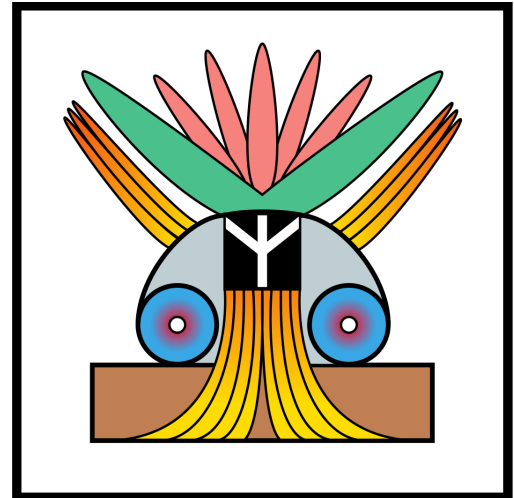

Religions

*Wrong Peace Symbol
The Death Symbol*

According to Billy and the extraterrestrials, the symbol we currently use for peace (left) is upside down and actually represents death (with a tree pointing downwards). This has a very strong subconscious effect on us which has exactly the opposite effect of peace, namely death, war and destruction. Thus, they urgently convey this information to us with regard to the true peace symbol (below) so that we can mitigate or in the best case, prevent the upcoming disasters we have created for ourselves through overpopulation and the resulting unrest, pollution, climate change (global warming), wars, etc.

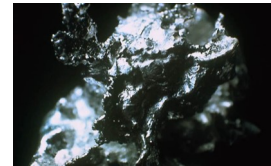

According to the extraterrestrials, the religions of Earth as they are now are a very negative influence which pushes us towards enslavement, exploitation and irrational thinking which makes us incapable of recognising the truth in all aspects of life. Furthermore, various religions can actually be traced back to other groups of extraterrestrials who came to the Earth in ancient times and presented themselves as gods, subjugating the population under their will. To this day, we have been under the spell of religious irrational teachings which only brings death and destruction. Since the dawning of the new millennium, much progress has been made with respect to technology, standard of living, medicine, etc., which have allowed us to unshackle ourselves from the religious influences more and more, however, our unbridled overpopulation and materialism still pushes us towards a dangerous trajectory. Should we decide to turn towards the better, we first need to completely unshackle ourselves from religious influences so that we can think rationally and recognise the real main problems we have on our planet.

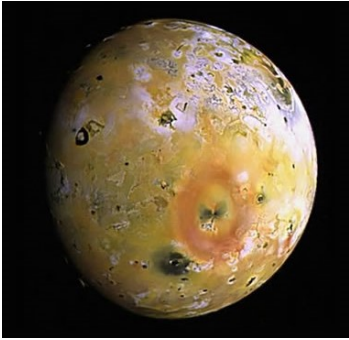

The True Peace Symbol

The Genuine Evidence

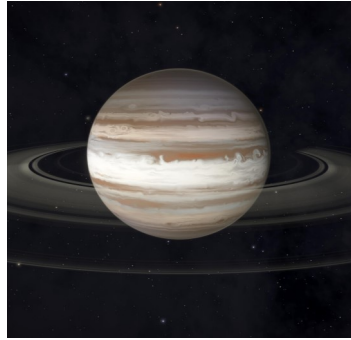

With an important message, the extraterrestrials know that evidence would be needed in order to support the genuineness of their contacts. For this, they have provided Billy with the opportunity to take hundreds of very clear photographs of their spaceships. From around 1975-1981, Billy published a very large album of photographs of the spaceships which were featured in various newspapers and magazines around the world. All of this was done prior to the advancing computer technology so that it was not possible for Billy to be accused of fraud by using computer photo-processors to fake the photographs. In addition to the photographic evidence, Billy also took videos and sound recordings of the spaceships and as well, material evidence was given to him which were all examined by various experts in their respective fields at that time, including metallurgist specialists, IBM chemists, photographic analysis specialists, government military contracted sound engineers, etc. whose findings all supported the authenticity of the case (see documentary 'Contact' - 1987).

Predictions and Prophecies

Within the information provided by Billy, there are also often prophetic and predictive information conveyed to him, such as data about the planets in our solar system, upcoming natural disasters, asteroids threatening our planet, new technological inventions, possible geopolitical conflicts, etc. These are meant to fore-warn and prepare us of the coming events. Many of these have already come to pass and some are yet to transpire. These can also be used to gauge the authenticity of the case, much of which are already published in books well before the discovery or occurrence of the predicted data or event.

Reception and Criticism

Billy's experience throughout the years has shown that conveying such profound messages to the population of Earth requiring such drastic changes is not well received. Sadly, to this day, he has endured a reported 20+ assassination attempts on his life. According to the investigations by the extraterrestrials, there are those who wish to silence Billy and cover up the information that he provides. There are also abundantly those who do not accept the message and depict his evidence as fraud and himself as a guru master, new age sect, etc. profiting from his endeavours. However, due to the importance of the information, and despite the critical reception and untrue accusations, Billy continues to selflessly fulfil his task with honesty to help the humanity of the world slowly realise the truth of our world, life and the universe, so that it is possible for us to find a better future for ourselves. To this day, he has founded the 'Free Community of Interests Universal' (FIGU) not-for-profit organisation which is dedicated to the preservation and dissemination of the information.

With such a controversial case containing information with tremendous impact to our present understanding, it is not surprising to see the critical response, and it is naturally up to each individual to decide whether they are willing to rationally take a closer look at the information or simply disregard it and walk away. However, according to the information, there will unfortunately nevertheless be a wake-up call at some point from the upcoming future events we have evoked for ourselves, in the form of natural disasters, shortages of food, wars, etc. Should we ignore the warnings of these messages, there would be a very bleak future ahead, or if we choose to acknowledge them and change accordingly, a brighter future will be ours...

Common Questions

Why do the extraterrestrials not just show themselves to us publicly so that we can recognise their existence for sure?

The reason why they do not just publicly show themselves to us is because of a directive that they have within their civilisation which prohibits them from making direct public contact with lower still developing civilisation such as ours. From their experience, direct contact with civilisations such as ours which are not yet capable of coping with the contact leads to negative consequences like: social-related unrest due to the disruption of established orders, e.g. government destabilisation, veneration of the extraterrestrials as gods, desire to acquire their technology and leading to misuse of technology, etc.

Another reason is based on the non-interference principle, in that they do not wish to interfere in the development of our civilisation and our free will and ability to think for ourselves, e.g. if they were to show themselves publicly, there would be no choice for us but to immediately accept their existence and the profound truth that we are not alone in the universe, and as a result, our free will and ability to think for ourselves would be impaired – leading to a disturbance in our development, exactly the opposite of their primary intention to help in the first place. Thus for the same reason, the evidence (photographs, metal samples, predictive information, etc.) given to us is always fine-tuned to a certain extent as to give the human beings a choice of whether to accept or reject it – although with enough intellect and rationality, one will no doubt see the truth behind all this.

How do we know that all this is real and not a hoax?

As mentioned earlier, the free will and thinking of the human beings need to be preserved at all times, and so it is up to each individual to decide whether this case is a hoax or real. There are no doubt many sceptics out there who have painted a bad picture for the case and portrayed it as a hoax, however, one should not just blindly accept what they see and so the other side of the picture needs to be examined as well to get a well-rounded picture, e.g. is it really possible for Billy to have faked the photographs back in 1975 during pre-Photoshop days and by using models to produce such clear and abundant photographs that had passed the photographic analysis done back then? What motives does Billy have in all this if it were a hoax, since Billy does not wish to gain fame or fortune? Why have there been assassination attempts on his life if it were just a hoax and why is this information seemingly ignored despite the abundant evidence? By examining the case and evidence closely, one can then draw a well-rounded conclusion as to whether this case is real or not.

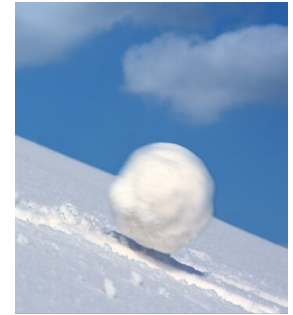

...continued

Why is Billy the only contactee?

One of the reasons for this can be found in the non-interference clause mentioned earlier, thus, they only provide information to single individuals who then act as a messenger to the rest of humanity or by sending development-aiding impulses to individuals without them knowing, e.g. to our scientists to help advance in technology, medicine, etc. or film makers to give inspirations. Another reason why Billy is chosen for this contact lies in his ability to carry out the necessary tasks associated with this mission successfully which the extraterrestrials have taken note of since his childhood. There are actually many things we have yet to discover regarding life and existence in our universe and the history of 'Billy' Eduard Albert Meier actually traces back millions of years according to the information – given that we eventually discover and acknowledge the existence of the human spirit-form which is existent in all of us individually, and reincarnates and gains experiences through many life times. For this reason, he is most experienced and suitable for the contact which actually requires tremendous amounts of effort and energy with not much to gain in terms of fame and fortune.

What can I do to help?

One of the main ways a person can help with the cause is to become informed about the real state of our world through the information provided. By becoming informed, one then has the ability to see the real dangers that lurk in our world and thus choose the appropriate actions to take, e.g. to live a better lifestyle that contributes to the well-being of the world. Furthermore, from this better lifestyle, one then becomes a good example for the fellow human beings and thus provide the fellow human beings with the opportunity to change themselves – since it is actually not possible to change another human being through coercion but only possible by providing information when appropriate in an instructive, helping and loving manner and by being a good example. The core of the information actually lies in the evolution of the human being and his/her consciousness (and spirit-form), and thus the evolution is the factor that cannot be coerced but can only come naturally by preserving the free thinking and free will of the human being. In this manner, the truth will slowly grow like a snowball rolling down a hill that becomes bigger and bigger until peace, love, freedom and harmony prevail on this world.
