

Turpin, Inc.

COMPANY OVERVIEW

- Turpin, Inc. is a licensed utility contractor that specializes in horizontal jack and bores from 12" diameter to 72" diameter casing installation.
- Turpin, Inc. was established in April 2000 and was incorporated in the state of Georgia as a corporation.
- Horizontal jack and bore has become an excellent method for crossing roads, interstates, rivers, railroad lines and wetlands without disturbing the eco-system or impeding the flow of traffic.
- Key areas of specialization include boring distances of 250 to 300LF for minimal grade sewer lines using the steering method as well as boring through solid rock using a special rock head for lengths up to 150LF depending on the type of rock and cutting pressure.

CORE COMPETENCIES & DESCRIPTION OF SERVICES AND/OR PRODUCTS

- Turpin, Inc believes that through job training education we can provide a safe environment to work for all parties including our employees, subcontractors as well as for employees of the general contractor.
- Our employees have completed these courses and are competent in the following areas: Excavations, GDOT flagging, GDOT welding, trench box safety, confined space, competent persons, NPDES level 1A, CPR-first aid, defensive driving and OSHA 10 hour training.
- Our services provide municipalities, contractors and utility owners a path for crossing roads, interstates, rivers, creeks and railroads without disturbing trees, plants, existing utilities or the roadway.
