Dear Colleagues,

Welcome back to Ojai and the 9th Annual Winter Symposium of the Headache Cooperative of the Pacific (HCOP).

On behalf of the board of Directors and the Program Committee, I want to thank you for your continued support and participation. You are what make this meeting great. This year, in addition to returning to Ojai (by popular demand), we are also returning to our bench to bedside and back format. The meeting's focus is on the complex, and often controversial relationship between the vascular system and headache.

We will begin with a talk by the ever-popular Alan Purdy, incoming president of the AHS on Cardiac Cephalgia. Then we will hear from Gretchen Tietjen on Giant Cell Arteritis, followed by a brief discussion. After the break our own Alan Rapoport will reflect on his 35 years as a headache specialist, complete with pictures. During lunch we will review interesting cases from our listserv and the afternoon will feature talks by Stew Tepper, Andy Blumenfeld, Deb Tepper, and Jack Schim. Day one will wrap up with another installment of Wait, Wait, Don't Tell Me, west coast style, along with wine and cheese, which may make Dr. Frishberg's stylings more palatable.

Day two will begin with spirited discussion a la Siskel and Ebert between Stew Tepper and Mo Levin, discussing the best articles in the last year, followed by KC Brennan who will look at the basic science of blood vessels and Marc Lenaerts, and Katherine Chong discussing various aspects of imaging in headache.

All and all, it promises to be a great meeting bringing together world-class authorities in headache medicine in a small, informal setting with lots of opportunity for interaction and questions. Jim Nagy and Judy Lane have put together a great agenda and we are grateful to them, as well as the volunteers, and especially Maripat Traino who has worked tirelessly to ensure that we have another successful event.

Enjoy the meeting.

Sincerely,

Robert P. Cowan, MD, FAHS
President

ABOUT HCOP

The Headache Cooperative of the Pacific (HCOP) is an association of headache specialists in the western United States.

HCOP meetings are designed to be held in smaller, intimate venues where healthcare professionals with an interest in clinical and basic research aspects of headache can come together to expand their knowledge base and share experiences, observations, and ideas in a casual and creative setting.

The symposium is intended to provide basic scientists and clinicians working in headache with a forum for translational talks aimed at increasing interaction between the two groups, nourishing creative solutions in headache medicine and research. The program is unique in that it is a small venue with very high level faculty, affording participants an opportunity to interact that is often missing at larger meetings. The program is also unique in that each year a different theme within the definition of translational approaches to headache is adopted, distinguishing it from the broader over view topics of clinical meetings or the potpourri of scientific presentations seen at scientific meetings. Feedback from participants at our previous meetings along with robust enrollment each year, indicates that this is a perceived need in the headache community.

HCOP MISSION STATEMENT

The mission of the Headache Cooperative of the Pacific is to promote communication and spread headache information among headache caregivers and researchers, to provide headache education for non-headache specialists, and to increase understanding of headache in the healthcare community through:

- Advancing the science of headache through education and coordinated research
- Providing a forum to link providers of headache care throughout the western states
- Supporting access to appropriate care for our patients
- Increasing awareness about national and international organizations and journals devoted to headache research and patient care

CONFERENCE EDUCATIONAL OBJECTIVES

At the completion of this program, participants will be better able to:

- Identify interactions between cardiovascular disorders and headache conditions
- Provide a full range of diagnostic and interventional possibilities for pro-thrombotic states in headache disorders
- Interpret advanced imaging studies for headache disorders

WHO SHOULD ATTEND

Attendance is open to healthcare professionals who treat or are interested the treatment of headache, specifically: Neurologists, General Practitioners, Internists, Headache Specialists, Psychologists, Psychiatrists, Dentists, Nurse Practitioners, Physician Assistants, Pharmacists.
