Can Tricks In The Bedroom Teach You Success Strategies For The Boardroom?

Yes! Yes! Yes! says Author Avril Millar

By Esther Harris

'The Kama Sutra of Work: Why Work is the New Sex and How to Make Sure You're Getting Enough' is turning heads everywhere with its bold and raunchy philosophy; that any woman can use the language of sex to create work they will enjoy, and from which they will earn a delightful reward.

While few might think of the office while steaming up the atmosphere in the bedroom, a compelling new book proves that the two settings are more closely linked than many would admit. Aimed at those who've accepted the fact that they'll likely be working 'forever', feisty Scotswoman Avril Millar's groundbreaking guide transports confidence and success in the bedroom to a financially comfortable future. If, like many women, "your pension will barely feed a mouse and your knight in shining armour has failed to materialize", Millar suggests we redefine our work to give us the lifestyle that we wish to become accustomed with. The 61-year old 'solopreneur' and mother of two, promises this is a simple matter of using our knowledge and confidence about sex to build varied and stimulating careers.

"Modern women today know how to call the shots in their sex lives," Millar says. "Now they need to start using the language of sex to create a range of work they will love for a lifetime, and that will make them happy, secure and independent." From 'Oral' to 'Coming First', through to 'Friends with Benefits' and 'Lubrication', work (and sex) will never seem quite the same again.

Millar is a former engineer, teacher, wealth manager, serial business woman — and now a non-executive director and consultant to many businesses in Europe. "I've never been happier at work — or better paid. The 'Kama Sutra' approach has worked for me, and it can work for you too."
