

MOVE YOUR HELIWAGON WHILE YOU ARE IN THE AIR TO ALLOW YOU TO LAND THE HELICOPTER INTO THE WIND.

The HeliWagon is engineered to provide an extremely stable and safe landing platform for light to mid sized skid helicopters. Industrial grade casters and drive wheels are designed to comfortably traverse minor changes in grade and clear low obstacles. The deck surfaces are coated with a thick, tough, durable and nonskid polyurethane liner that is resistant to fuels, hydraulic fluids and other caustic chemicals.

- Wireless remote control
- (FHSS) Remote control is FCC approved
- Eliminates tugs and tows
- Eliminates hanger rash
- Maneuvers easily in tight areas
- One person operation
- 360 degree "walkaround" capability
- 8,000 lbs weight capacity
- Onboard charger
- 17" low profile deck
- 200' per minute maximum forward speed
- Over four hours of continuous run
- Tow bar assembly with 2" receiver hitch
- Self-contained tool box
- Easy to monitor and manage
- Lights
- Commercial grade batteries
- Powder coated frame
- Tether controlled capabilityPlugs into 110 or 220 outlet

TAKE YOUR AIRCRAFT OUT OF THE HANGER WHILE YOU SIT IN THE COMFORT OF YOUR COCKPIT.

The HeliWagon is one of the industry's greatest recent innovations. It is a landing and ground transport dolly that simplifies and saves time, labor and costs of handling your helicopter while it's on the ground. The HeliWagon is a fully-contained electronic, rechargeable, motorized heli-ground transport system with 'wireless remote control' and 'tethered control' capability.

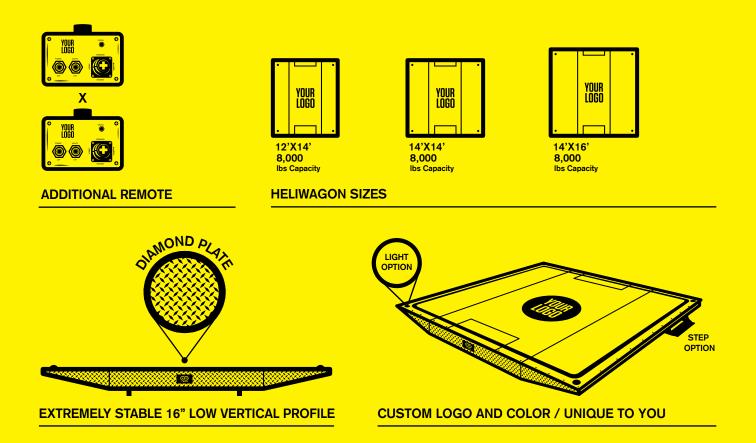

MOVE YOUR HELICOPTER FROM INSIDE OR OUTSIDE THE COCKPIT WITH YOUR WIRELESS CONTROLLER.

HELIWAGON / CUSTOM SOLUTIONS

START BUILDING YOURS TODAY

"THE HELIWAGON HAS BEEN A MAGNIFICENT TIME SAVER DISPATCHING AND RETRIEVING MY HELICOP-TER. IN THE PAST WE WOULD SPEND 15 TO 20 MINUTES TAKING OUR HELICOPTER IN AND OUT OF OUR HANGAR. (OFTEN TIMES FREEZING AND DARK). NOW WE ARE DOWN TO SECONDS." **ROB FINLAY, FINLAY COMPANY** "WE PURCHASED THE FIRST HELIWAGON FOR OUR NEW BELL 429. AFTER USING IT FOR TWO WEEKS WE PURCHASED OUR SECOND UNIT FOR OUR BELL 407. THEY ARE THE BEST WAY TO MOVE BOTH HELICOPTERS IN AND OUT OF OUR HANGER, AND THE SAFEST FOR THE TIGHT AREA WE WORK IN. THANK YOU FOR YOUR GREAT CUSTOMER SERVICE AND SUPPORT. IT IS NICE TO KNOW THAT THE TWO HELIWAGONS WILL GIVE US A LIFETIME OF SERVICE AND A TEAM LIKE YOURS TO BACK IT UP." GREG MIELKE CHIEF PILOT, OPS ROBERTS RANCH AND INVESTMENTS

"ONE OF THE BEST FEATURES IS YOU CAN TURN THE HELIWAGON AROUND AND LAND INTO THE WIND, UNLIKE A CONVENTUAL DOLLY, THE WIND SEEMS TO CHANGE FROM WHEN YOU TOOK OFF, THEREFORE THE HELIWAGON IS A MUCH SAFER OPERATION" MCCALL HELICOPTERS "SINCE THE PURCHASE OF OUR HELIWAGON, OUR RESPONSE TIME TO GET AIRBORNE HAS DRAMATI-CALLY DECREASED. THE EASE OF OPERATION TO GET IN AND OUT OF TIGHT AREAS, COMBINED WITH NO LONGER NEEDING A TUG, A DOLLY, AND A GPU MAKES HELIWAGON THE ONLY WAY TO MOVE YOUR HELICOPTER PERIOD!" MARK-F.B.I.

"YEARS AGO IF SOMEONE HAD ASKED ME IF A PRODUCT TO TRANSPORT HELOCOPTERS COULD BRING ME MORE HAPPINESS THAN MY HELICOPTER ITSELF, I'D SAY THEY WERE CRAZY! AFTER THE ARRIVAL OF MY NEW HELIWAGON, I'M NOT SO SURE. THIS WILL CHANGE THE WAY HELICOPTERS ARE MOVED IN AND OUT OF HANGARS FOREVER. IT'S BEAUTIFUL, UNIQUE, AMERICAN BUILT, FUN AND EASY TO USE. HELIWAGON IS BY FAR THE BEST PRODUCT I'VE SEEN IN DECADES!" GEORGE MILFORD-HAVEN
