## ANNUAL RAM SALE

Saturday, September 08, 2018

Eureka County Fairgrounds

9:00 AM Ewes and Rams available for inspection

12:00 Noon Lamb Luncheon provided by Rafter 7

1:00 PM Sale begins

Our objective at Rafter 7 Merinos, Inc. is to constantly provide profit building genetics for the sheep industry. Through research, artificial insemination, data analysis, and constant focus, our modern day dual-purpose bloodlines have proven to enhance sheep industry profits. We emphasize quality wool production, lambing rates, hardiness, longevity and herding instinct, among others, as profitable production traits.

Rafter Seven will offer 200 high-quality purebred Merino and our Rafter 7 Line of Merino X Rambouillet rams, both yearlings and two year olds. Our yearlings offer an extra year of longevity, and our two year olds provide insight into the mature wool grade of our animals, ranging from 17 to 24 micron. Immediately following the ram sale, 25 purebred Merino and 25 Rafter 7 Line yearling ewes will be auctioned. The information in our catalog provided is pertinent data as a guide to aid in your selection choice, for conception, mothering, weaning weights, and wool.

To our long time supporting customers and friends, and to all interested in beginning on a path to increasing the bottom line in their dual purpose sheep, we invite you to our sale on Saturday, September 8. Come visit with friends in the industry and enjoy a nice lamb luncheon. For more information or questions please don't hesitate to contact us by phone or email.

Thank you.

Rick Powers & Tom Filbin

Tom (775) 221 3206

PS

Eureka DVM Dr. Darla Baumann (ph. 775-237-5100) will be in attendance to provide health certificates, if needed.

## TRAVEL INFORMATION

### Airports:

Eureka County	ph. (775) 237-6100	paved - 5 min. from sale
Ely City	ph. (775) 289-8804	paved – 80 miles “ ”

Elko Regional (EKO) ph. (775) 777-7190

**Delta/Sky West**  
3 flights daily (SLC)

Reno-Tahoe (RNO) multiple commercial flights then 243 miles to Eureka

Las Vegas (LAS) multiple commercial flights then 329 miles “ ”

Salt Lake City (SLC) multiple commercial flights then 315 miles “ ”

### Hotels

Gold Country Inn – Eureka (775) 237-5247

Sundown Lodge – Eureka (775) 237-5334

Ruby Hill Motel – Eureka (775) 237-5339

Ramada Inn – Ely (775) 289-4884

Jailhouse Motel/Casino - Ely (775) 289-3033

Prospector Hotel/Casino - Ely (775) 289-8900

Park Vue-Ely (775) 289-4497

La Quinta – Ely (775) 289-8833

Ely is about 80 miles East of Eureka.

Gold Country Inn/Casino – Elko (775) 738-8421

High Desert Inn – Elko (775) 738-8425

Holiday Inn Express – Elko (775) 777-0990

Red Lion Hotel/Casino – Elko (775) 738-2111

Elko is about 110 miles North of Eureka.

## Directions

### If coming from the North from I-80:

Exit I-80 in Carlin, NV which is about 20 miles west of Elko.

Coming from the west, take the first Carlin, NV exit (279) onto Hwy 278

From the east, take the Carlin, NV exit 280 into town and follow road signs to Hwy 278

Once on Hwy 278, drive south about 90 miles to Hwy 50.

At Hwy 50, turn east towards Eureka. The Fairgrounds is about 1.5 miles on the left

### If coming from the West on Hwy 50:

Look for the Fairgrounds on the Left

about 1.5 miles after passing by the Hwy 278 intersection

### If coming from the South and East

From various points travel to Ely, NV, then, travel west on Hwy 50 through Eureka. Look for the Fairgrounds about 1 mile west of town on the right.

# Explanation of Performance Records

Yearling rams and ewes were born from early April to end June.

Lower numbers within breed groups were the earliest born.

Horn Type: H = Horned; P = Polled; Sc = Scurved

Type of Birth and Rearing: 1 = Single, 2 = Twin, 3 = Triplet.

The yearling rams and ewes were shorn at 9 1/2 months of age. Fleece weight and staple length were obtained at shearing, and are (bellies out) and adjusted to indicate 12 months of wool at 68% yield.

Side samples were obtained prior to shearing and were analyzed for fiber diameter, comfort factor (CF), and CV micron using an OFDA 2000 provided by the American Sheep Industry Association.

CV micron criteria demonstrates the quality of wool within our flock, and processing efficiency into yarn.

Low CV is valued more amongst wool processors worldwide for this reason. The measurement of 19 is the international standard of quality, and USA non Rafter 7 bred wools typically range in the area of 21-24, well below the Australian standard.

Comfort factor (CF) is an indicator of comfort of a wool fabric when worn next to the skin.

A CF of 98 or higher would be comfortable when worn next to the skin. Comfort factor is not listed in this years catalog as all animals test 98 and better.

Our records have indicated that these rams at maturity will have a fleece 2 - 4 microns higher than their yearling micron test. However, they are genetically capable of producing mature ewes with a fiber diameter close to their yearling fiber diameter.

All animals were weighed in late July, and should be heavier by sale time.

## SPECIAL NOTES

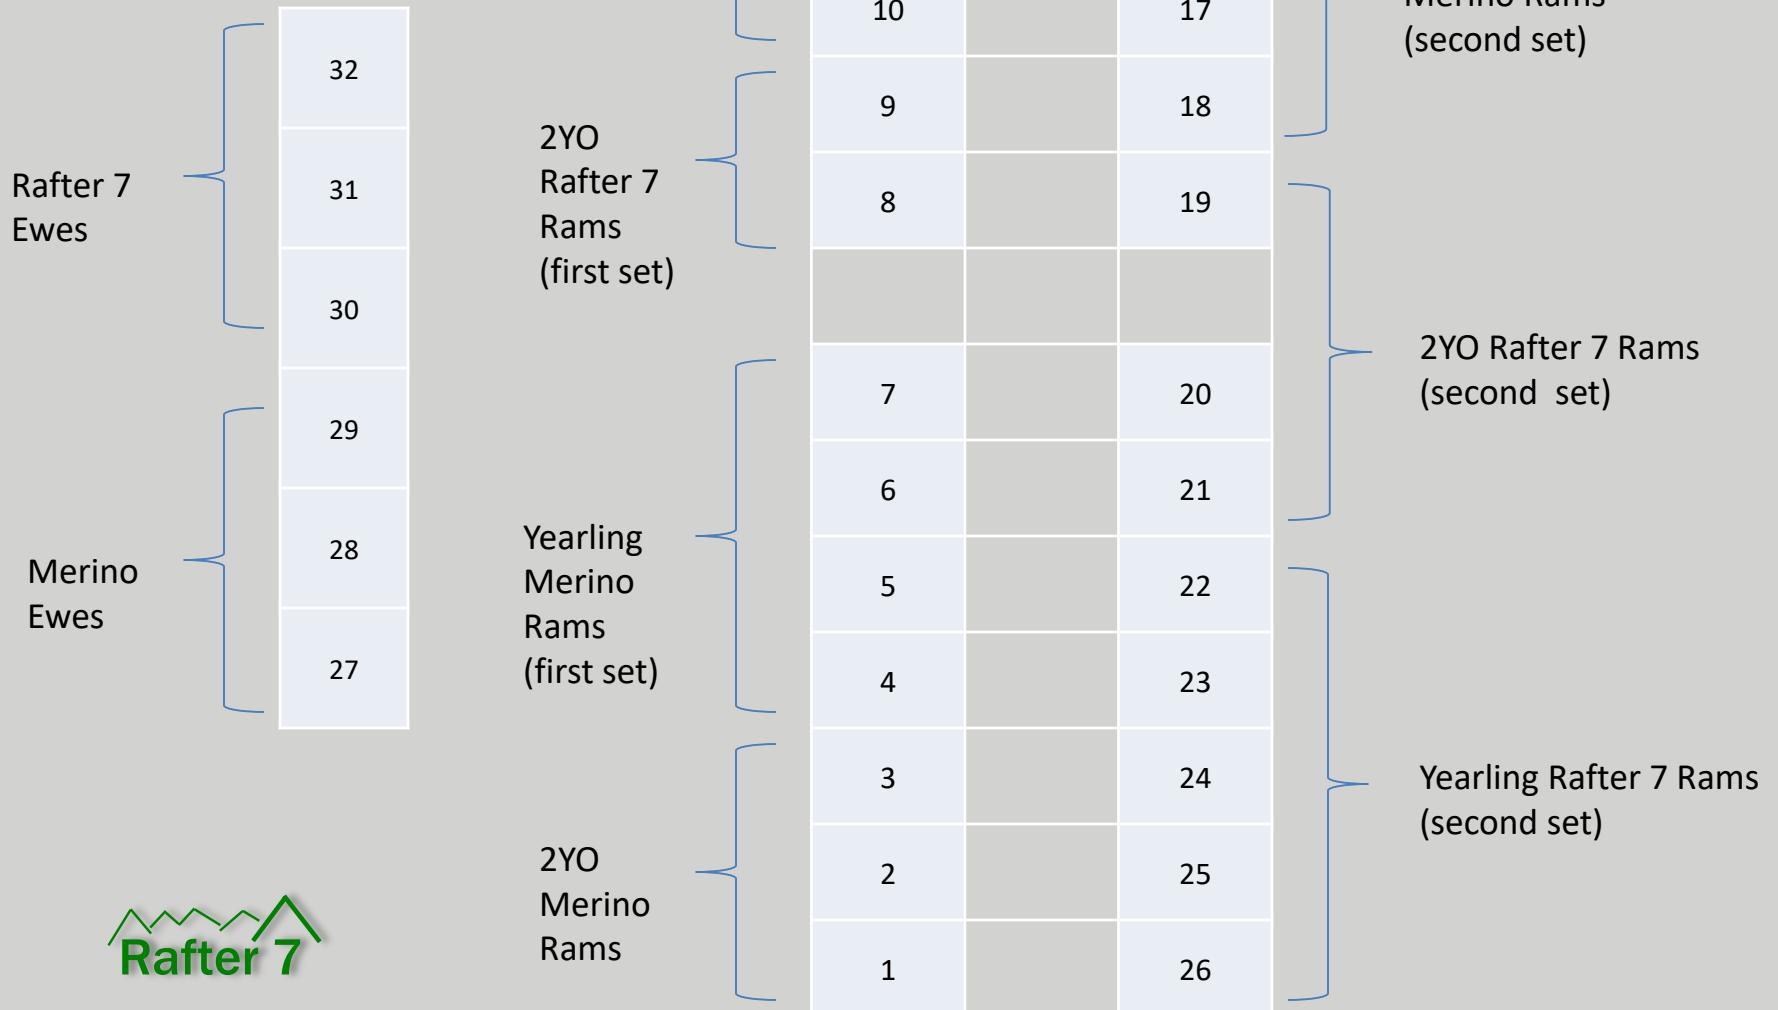

Value Formula and EBVs are found on the right side of the catalog. This year I have used the Western Range Index for calculation of EBV, as well as Rafter Seven EBVs for wool Value, Lamb Value, and Combined Value. In case of our EBV expression, 0.0 is the average for the particular group of animals, a positive number indicates that animal is better than the mean, a negative number is an animal below average for the group. Calculations are by age and set, meaning 2 year old studs, yearling studs, and yearling ewes are 3 different calculation sets. Keep in mind that only these rams made our sale, after extensive culling and sifting.

As an indicator of our current selection process, we continually sift breeding ewes based on the following criteria.

- Propensity to twin – average lambs weaned over the breeding life of the ewe
- Weaning weight of lambs weighed at market values
- Lb. of Wool shorn, fleeces estimated to be 68% clean wool after washing
- Micron of wool shorn at market values
