

## Hezekiah

When I started out the internships I didn't know if it was what I was supposed to be doing this year but after a while so many testimonies started flooding in that I cannot deny that this is what I was supposed to be doing a few days before we were supposed to go to Baileys my passport had not come to me yet I called them and they said it still hadn't finished processing so our whole group began to pray about it and I began to ask prayers from all my friends to pray for it to come about a day before we left I received it and I also received a letter the same day from the passport company saying we are sorry but you will have to send us more information for us to finish processing it so even when the world tells you can't God can do all things if we just ask him diligently!

When I first came into the internship and I walked in and met the interns I did not expect that I would become very close friends with like I did I thought maybe one or two of these people could come to maybe a small understanding of who I was but much to my amazement I began to try and get to know each one of them individually and I was able to open up with them like they were my family and my very close friends and the Lord blessed me in friendships with each one of them and I feel very close to all of them to this day!

One night my two roommates and I were talking about truth and what we thought was true and what was not in our lives the very next day a man came in to teach class and he taught a class called the table of truth and it was about cutting out falsehoods that were in our life and going back to Jesus and what was true and surprisingly that man never talked really on that subject before I was told he always talks on a different subject so it was an amazing testimony to me that we were supposed to be talking about that the night before!

Before internship started I had got a job 5 days beforehand in cement work which I had never done before and I've got the job and had the job so I could go out to a friend's birthday party in Colorado and for no other reason that I got it but when we went down to Baileys at one of our service projects I never expected to be doing this but they wanted me to do cement work so it was a huge testimony in my life that all the things that you do God has a plan for you and it all connects and adds up to one master plan!
