

DEEP — TIME — WALK

WALK 4.6 KM AND LEARN ABOUT 4.6 BILLION
YEARS OF EVOLUTION & THE IMPACT OF OUR
SPECIES

Learn

From stardust, shifting tectonic plates through to ice ages, dinosaurs and humans. An exciting guided walk learning about key evolutionary events in time to comprehend the vast scale of deep time and the impact of our species on our Papatūānuku.

Why

Exploring our local waterways and environment through broad and deep learning in real-life contexts will enrich all areas of the curriculum.

This outside the classroom designed learning experience ensures memorability and makes the subject “come to life”.

Arrange a Time Walk

Who

The guided walks are aimed at students from Intermediate to High School and for those schools committed to broadening our children's horizons and giving them a holistic education. Engage with your community and environment in a unique and interesting way.

We offer three carefully designed time walks

We explore the evolution of our planet and also include important local Maori and European history and environmental aspects of Ōtautahi.

Coastal - Embracing the new coastal pathway; walk on a beach, by an estuary and salt marsh starting at Tuawera/Cave Rock to Indies Park, Mt Pleasant Memorial Community Centre.

Red Zone - Explore recent and past impactful events starting at the Garden of Peace in River Road to Victoria Square following the Ōtākaro-Avon River.

Ōpāwaho-Heathcote - Experience the many surprising community and historical aspects of this wai.
