

# MIDWEST VACUUM PUMPS EXCLUSIVE EXCHANGE PROGRAM

Our exclusive Pump Exchange Program is designed to minimize your downtime. MVP works hard to keep a fully stocked inventory of the most popular rebuilt pumps ready to ship at a moments notice!

Here's how the program works:

- Call us with your pump requirement & we will verify the pump model you need is in our inventory.
- We will send you a Standard Rebuild sheet with the pricing requirement to be on your Purchase Order.
- After receiving your Purchase Order and shipping instructions, we will ship the pump to your facility.
- You ship back to us the non working pump (referred to as the core).
- We will teardown your old pump and invoice you for what it will take to rebuild it.
- Your old pump will be used to replenish our inventory.

It's that simple! You get a replacement pump quickly so you can get back to production , & we get to replenish our inventory with your old pump!

Midwest Vacuum Pumps requires a hard copy of a Purchase Order that states the not to exceed amount listed on the Standard Rebuild sheet, BEFORE any pump (s) leave the facility.
