

# *Peoples Foundation for Connecting Community, Military & Veteran's Services*

---

Would you like to reach youth and young adults in a meaningful way by speaking with them about your life lessons and career successes. In the hopes that you inspire them to continue with their education and strive towards their dreams and goals. In our mentor-speaking opportunities you have the chance to do just that. Thank you for volunteering to support our in-class mentoring program by guest speaking and sharing your experience to inspire the youth our community. Local educators need our help; we've listened and support their desire for success in the classroom. Completing this form will enable and guide your discussion with the students during your speaking event. We thank you and look forward to your participation and the students hearing your story.
